WHAT IS NEW ZEALAND RISING?

New Zealand Rising is an alliance of separate groups and individuals from all across New Zealand who believe in a better future. We are many different people with different views, however we all share a common vision for the future.

"We, the people, stand united for a New Zealand that is respectful, includes everyone, and is free of government overreach"

"Kia tūkotahi tātou ō Aotearoa, hei whakarangatira tātou i a tātou. Herea te Kāwanatanga, kia kore e pēhia te mana o te tāngata"

[Our website](#) contains a directory of all groups around New Zealand that share this vision.

PASS IT ON

From the Editor: Is time speeding up, or is it just me? The ride lately continues to feel like a rollercoaster. Being the captain of your own ship and keeping a steady hand on the wheel is key as the seas get rough. But there are blue skies beyond. Overall, there is much for which to be grateful and optimistic. Feeling overwhelmed? Go help somebody or do something to spread the truth. and don't forget, keep a sense of humour.

NZ NEWS

What's going on with the Treaty?

Whatever your view on the Hikoi this week, it is undeniable that it was a big protest against ACT's Treaty Principles Bill. And whatever your view on the Hikoi hopefully you agree that the police are paid to represent all New Zealanders and to act impartially at all times. Taking part in a protest against against the Government, while in uniform, is not acceptable.

The crux of the Bill is an attempt to have Parliament redefine the Treaty Principles, rather than how they have been defined by the courts and the Waitangi Tribunal. The Bill has now had its first reading and is due to go to Select Committee for public consultation. The Bill only has backing from National and NZ First to this stage, therefore it is extremely unlikely it will go any further.

But the story about the Treaty Principles does not end there. NZ First have argued that there are no principles and therefore they should be dropped from all legislation. On The Platform this week, Michael Laws told a caller that NZ First are in the process of removing the treaty principles from legislation with the first report due back before end of year.

Puberty Blockers may finally be coming to an end

Consultation on safety measures for the use of puberty blockers in young people with gender-related health needs

Says Penny Marie of Let Kids Be Kids, "Let's all get our information and evidence in by **20th January**. Many LGBTQIA+ lobbyists will want them to stay. Parents want them to go." See LetKidsBeKids' post [here](#):

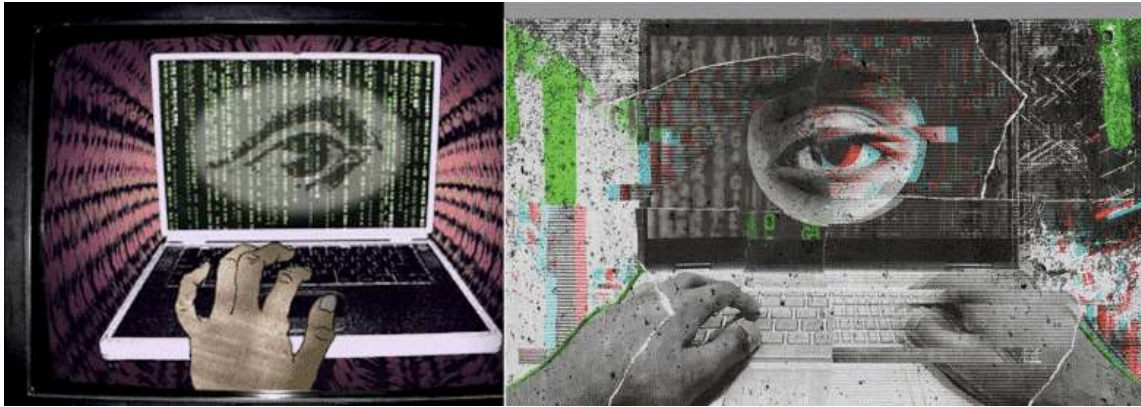

The Government has tasked the Ministry of Health with consulting on whether there should be additional safety measures for puberty blockers, such as regulations under the Medicines Act.

On 21 November 2024 the Ministry of Health published its evidence brief and position statement on puberty blockers.

The Evidence Review found a lack of good quality evidence for the effectiveness or safety of puberty blocking treatment in young people with gender dysphoria. "We do not have good evidence to say that the medicines used improve the longer-term outcomes for young people with gender-related health needs – nor that the potential longer-term risks are low".

The Disinformation Project is infiltrating unions, civil service, journalism

The Disinformation Project is not a random, benign creation that just ‘happened’. It is a tool of the Censorship Industrial Complex, and it’s recruiting strategic allies.

The Disinformation Project is a secretive organisation. It only responds to media ‘friendly’ entities to promoting its ‘research’, but refuses others, such as The Platform, that attempt to force some transparency from them on the grounds of ‘safety’.

Yes, they can speak of the dangers of vaccine sceptics, of freedom fighters and women’s rights campaigners without being challenged but don’t much like telling us about how the group is funded. Have you ever heard a legacy media journalist ask them, or challenge their dubious methodology?

Targeting journalists

The Disinformation Project was [caught out](#) last year attempting to run secret workshops for select journalists organised by the Science Media Centre, but once again used the ‘safety’ excuse to cancel once they were exposed. It’s frankly far more likely they were hoping to avoid another incident [like this](#).

NZ Police Forced to Drop All Covid charges Against Brian Tamaki

After a long battle with the authorities, all police charges against Brian Tamaki have been dismissed. NZ Advocacy Group Kicks Off "Cash Out Fridays"

The group says, "Join others in NZ in withdrawing cash and spending it at local businesses every Friday to help keep cash alive in our communities."

Why is this important? "Cash provides financial freedom, privacy, and resilience - especially during times when digital payments may not be an option. It also supports the local economy."

They add, "We want to see your Cash Out Friday experiences! Share your photos, videos, or status updates using #CashOutFridays and let's celebrate the power of cash together."

The group says, "Make every Friday a day to support our local shops and keep cash thriving in New Zealand." You can learn more [here](#):

Australian Doctor Launches Class Action

Against Adverse Effects Of COVID Vaccine

From: [Mackay and Whitsunday Life](#)

A Whitsunday doctor is taking the lead on fighting for the rights of people who have suffered loss and damage as a result of being injected with one or more of the COVID-19 vaccines. Dr Melissa McCann is launching a nation-wide Class Action lawsuit to fight what she believes to be a failing government compensation scheme and unsafe vaccine.

For the past 10 years Dr McCann has practiced as a GP in the Whitsundays and she now chooses not to administer COVID vaccinations since witnessing first hand serious adverse events after these vaccines; and also following the introduction of mandates which she believes interfere with informed consent and medical ethics.

Since the vaccination became available, Dr McCann has witnessed an unusually large amount of patients presenting with adverse effects such as chest pain, blood clots, miscarriages and strokes shortly after receiving a COVID vaccination. BREAKING NEWS: DNA Contamination Exposé Port Hedland Council Pushes Canberra to Face the Truth

In a dramatic turn of events, Port Hedland Council in Western Australia has taken a bold stance, challenging Canberra on a matter of profound national significance—DNA contamination in medical treatments.

As the capital's silence persists, all eyes are on the council's Special Meeting tonight (11th October), where a hard-hitting motion could shift the trajectory of the debate.

This evening, at 7 pm Perth time, Councillors Adrian McRae and Camilo Blanco will lead a discussion centered around letters from Russell Broadbent MP to the Prime Minister, and a bombshell DNA contamination report by Dr. David Speicher. The agenda aims to break through the political gridlock by initiating a wave of communication across Australia's 537 local councils. If the motion passes, it would compel each council to confront a legal duty of care—potentially pressuring Canberra to acknowledge the mounting concerns.

The ramifications extend beyond Port Hedland. Read the rest of this story [here](#):

Jaw Dropping Video by RFK Jr Will Have You Looking at Food Labels Like Never Before

Robert F. Kennedy Jr., America's new HHS Secretary, is finally bringing attention to a long-overlooked crisis: the dangerous quality of food in the United States. In this critical video, Kennedy sounds the alarm about processed foods loaded with chemicals and unnatural ingredients—many of which are already banned in other countries.

It's a powerful reminder that what Americans consume daily is far below acceptable health standards.

Under Biden-Harris, corporate food giants have been allowed to flood the market with toxic products, prioritizing profits over public well-being. RFK Jr. is committed to putting an end to this.

He understands that a true health revolution starts with what's on Americans' plates, and he's ready to make these harmful additives illegal in the U.S.

This overhaul can't come soon enough. Although NZ's food supply isn't quite as bad, there's still work to be done here. Hopefully we see a knock-on effect here.

Dangerous New Escalation in Russia, & US's Blackmailed Politicians

"I think we're watching the most evil thing I've ever seen in my lifetime, which is the lame duck administration leaving the next administration with a world war, with a nuclear conflict by allowing Ukraine a proxy state of the United States to strike within Russia.

I think that people in Washington misunderstand Vladimir Putin and they think he's a monarch with absolute power, which is not true. And Russian politics is complex and it's lively. And Putin is very concerned with his approval rating within Russia. He cannot appear weak." Glenn Greenwald and Tucker Carlson discuss the current escalations driven by the Biden Administration.

A short clip of the discussion is [here](#). The whole interview can be seen [here](#):

Fauci's lawyers admit that RFK Jr. had been right all along

Having been called a liar by Anthony Fauci for saying that "not one of the 72 vaccines mandated for children has ever been safety tested", RFK Jr. sued Fauci.

After a year of stonewalling, Fauci's lawyers admitted that RFK Jr. had been right all along. "There's no downstream liability, there's no front-end safety testing... and there's no marketing and advertising costs, because the federal government is ordering 78 million school kids to take that vaccine every year."

"What better product could you have? And so there was a gold rush to add all these new vaccines to the schedule... because if you get onto that schedule, it's a billion dollars a year for your company."

"So we got all of these new vaccines, 72 shots, 16 vaccines... And that year, 1989, we saw an explosion in chronic disease in American children... ADHD, sleep disorders, language delays, ASD, autism, Tourette's syndrome, ticks, narcolepsy."

"Autism went from one in 10,000 in my generation... to one in every 34 kids today." See the video [here](#):

Dr. Peter McCullough has called on Trump to REPEAL the 1986 Vaccine Injury Act. This would strip Big Pharma of its liability shield, making them accountable for injuries caused by their products. Dr. McCullough said - *"Americans deserve safe vaccines. And when they are applied, the company should stand behind their products, and they should have this liability shield removed."* Dr. McCullough also urged President-elect Trump to pull the COVID jabs off the market. *"They have not had the safety track record America wanted to see. And sadly, so many have suffered injuries, disabilities, and even death."* -

Telling It Like It Is

RFK Jr. set a journalist straight on the topic of vaccines. Kennedy stated: *"My position on vaccines... is that vaccines should be tested, like other medicines. Of the 72 vaccine doses now mandated for American children, none of them, not one, has ever been subject to a pre-licensing, placebo-controlled trial. Other medicines are required to do that, and we should have to do that for vaccines. If I'm wrong, show me the test. Show me the study. You won't be able to, because there are none. That means that we don't know what the long-term risks are."* -

In a powerful call for accountability, Jörges named prominent figures who should come forward and apologize including all those who championed the phrase 'pandemic of the unvaccinated.' Jörges said: *"I think they should now publicly apologize for it. New data from the National Institutes of Health reveal the agency and its scientists collected \$710 million in royalties during the pandemic, from late 2021 through 2023. These are payments made by pharmaceutical companies to license medical innovations from government scientists. Almost all that cash — \$690 million — went to the National Institute of Allergy and Infectious Diseases, the sub-agency led by Dr. Anthony Fauci, and 260 of its scientists. OpenTheBooks.com was forced to sue to uncover the royalties paid from September 2009 to October 2021, [which amounted to \\$325 million](#) over 56,000 transactions. - <https://nypost.com/2024/06/02/opinion/nih-scientists-made-710m-in-royalties-from-drug-makers-a-fact-they-tried-to-hide>

Kennedy's prediction at the beginning of Covid were bang on. He predicted the vaccine would be sold as 100% effective, then this would gradually be reduced. Also, that the shot would be sold that one shot would give life-long immunity. Then this too would be gradually softened until it would be declared that shots are needed yearly if not more often. I'd say he called it. - <https://x.com/i/status/1854868199994523793>

An article by Dr. Russell Blaylock published in Surgical Neurology International states: *"The COVID-19 pandemic is one of the most manipulated infectious disease events in history, characterized by official lies in an unending stream lead by government bureaucracies, medical associations, medical boards, the media, and international agencies. We have witnessed a long list of unprecedented intrusions into medical practice, including attacks on medical experts, destruction of medical careers among doctors refusing to participate in killing their patients and a massive regimentation of health care, led by non-qualified individuals with enormous wealth, power and influence. For the first time in history medical treatment, protocols are not being formulated based on the experience of the physicians treating the largest number of patients successfully, but rather individuals and bureaucracies that have never treated a single patient—including Anthony Fauci, Bill Gates, EcoHealth Alliance, the CDC, WHO, state public health officers and hospital administrators."* - <https://pmc.ncbi.nlm.nih.gov/articles/PMC9062939/>

John Leake stated in an article on Dr. Peter McCullough's substack: *"Anyone who has seriously studied medical history understands that rigorous public sanitation and antibiotics are the true vanquishers of infectious diseases, and NOT vaccines. The Vaccine Cult was born and promulgated during a time when most of humanity lived in squalor. Enormous advances in sanitation, clean water, modern washing appliances for bed linens, etc., have revolutionized public health. Moreover, many infectious diseases that formerly killed children are now easily treatable with antibiotics and other medical advances. And yet, vaccines remain a Sacred Cow."* - <https://petermcculloughmd.substack.com/p/nato-and-vaccines-the-twin-sacred>

Shelley Luther was jailed for a week after she kept her salon open despite COVID lockdowns. Now, she has secured a seat in the Texas House. *"From the jailhouse to the Texas House,"* Luther [wrote](#) on X following last week's victory. Luther won 77.7% of the vote. Luther was featured in the national news after she was arrested in 2020 for reopening her hair and nail salon despite COVID lockdowns. She was sentenced to seven days in jail and fined \$1000 for each day her salon was open after a court ordered it closed. At the time, Luther [said](#) that, contrary to Dallas County Judge Eric Moyer's denunciation of her decision as "selfish," it was intended to prevent her children and employees "from going hungry." *"If you think law is more important than kids being fed, go ahead with your decision. But I'm not going to shut the salon."* Almost a year after Luther was jailed, the Texas Supreme

Court declared that the county's temporary restraining order on her was too vague to enforce and thus voided the order holding her in contempt of court.-

Legal

A woman fired by Blue Cross Blue Shield of Michigan for refusing the COVID-19 vaccination has been awarded more than \$12 million in damages. A jury awarded Lisa Domski \$10 million in punitive damages, \$1 million in non-economic damages, \$1.375 million in front pay damages, and \$315,000 in back pay damages. Jurors said that Blue Cross Blue Shield illegally discriminated against Domski when the company denied her request for an exemption from its policy requiring COVID-19 vaccination. The jury found the company also illegally terminated Domski over the lack of COVID-19 vaccination. According to Domski's attorneys, because she worked from home, the company could have accommodated her safely. They said Blue Cross Blue Shield also denied more than 500 other religious accommodation requests and fired hundreds of employees in addition to Domski over vaccine refusal. Blue Cross Blue Shield said it did not discriminate against Domski and said her religious beliefs were not sincere. The jury saw it different. Seems another 500+ are in line for millions. - <https://www.theepochtimes.com/us/jury-awards-12-6-million-to-woman-fired-for-not-receiving-covid-vaccine-5757873>

Louisiana's U.S. District Court has ruled in favor of the State of Missouri, allowing additional discovery in the [Missouri v. Biden](#) lawsuit, which scrutinizes government collaboration in social media censorship. Initial findings from the limited discovery available at the preliminary injunction stage revealed an extensive network of censorship involving more than a dozen agencies and over a hundred government officials, possibly implicating many more yet uncovered. These agencies were reportedly directed by the White House to manipulate social media content, particularly contradicting the federal government's stances on issues from COVID-19 to electoral processes. The depth of the Biden Administration's involvement in these censorial activities likely would have remained hidden without this lawsuit. - <https://www.lifesitenews.com/news/judge-allows-more-evidence-discovery-in-biden-big-tech-collusion-lawsuit>

The FLCCC Alliance announced that its co-founders, Dr. Pierre Kory and Dr. Paul Marik, are seeking to join the Association of American Physicians and Surgeons' [federal lawsuit](#) against the American Board of Internal Medicine and other board-certifying organizations as well as the Biden Administration. This lawsuit, filed in U.S. District Court in Galveston, TX, seeks to hold accountable entities that have not only censored but retaliated against physicians for advocating evidence-based approaches to patient care that are contrary to public health agency directives. The lawsuit contends that board-certifying organizations, including the American Board of Internal Medicine, the American Board of Family Medicine, and the American Board of Obstetrics & Gynecology, have acted in concert together and with the federal government to suppress and retaliate against physicians with dissenting viewpoints, thus infringing upon First Amendment rights. The case against ABIM and its co-defendants was originally dismissed by the District Court but was reinstated by the Fifth Circuit in [its opinion](#) that expressed strong concern about the suppression of medical viewpoints. - <https://open.substack.com/pub/flccc/p/flccc-co-founders-join-aaps-lawsuit>

Lawyers with the Democracy Fund have achieved a significant legal victory, successfully reopening six additional Quarantine Act tickets issued to members of an Amish community in Grey County Ontario. One of the most alarming cases involved the posthumous conviction of a married Amish man. Not only did the government obtain a conviction after his death, but a lien was placed on the marital property, compounding the family's grief and financial burden. TDF's legal team successfully reopened this ticket, along with the ticket issued to his wife. The TDF's legal team has been successful in ensuring that, to date, all Quarantine Act-related liens registered on their clients' property are removed. This allows clients to move forward with the legal process without the immediate financial burden that these liens would impose on their families. -

Also due to the work of the Democracy Fund, charges have been withdrawn against St. Catharines resident Terri Haydar, for gathering in public in 2021. Terri Haydar, a retired correctional officer, and founder of Mama Bears, was charged for attending a peaceful protest in April 2021 under COVID-19 legal restrictions. With The Democracy Fund's legal help, she has had all charges withdrawn. TDF Lawyers maintained that Haydar's case should not be pursued due to a lack of public interest. Last week, the Crown agreed. This decision marks a significant step forward for civil liberties during a period of contentious and heavy-handed pandemic-related laws. -
