

The new paradigm is NOT going to be created by those following the status quo.

It's going to be built by the rebels, revolutionaries, trailblazers and change-makers.

Those willing to go against the grain, walk the road less traveled, speak their truth and push the limits on what's possible.

It's time to embrace your warrior spirit and become who you were destined to be.

WHAT IS NEW ZEALAND RISING?

New Zealand Rising is an alliance of separate groups and individuals from all across New Zealand who believe in a better future. We are many different people with different views, however we all share a common vision for the future.

"We, the people, stand united for a New Zealand that is respectful, includes everyone, and is free of government overreach"

"Kia tūkotahi tātou ō Aotearoa, hei whakarangatira tātou i a tātou. Herea te Kāwanatanga, kia kore e pēhia te mana o te tāngata"

[Our website](#) contains a directory of all groups around New Zealand that share this vision.

PASS IT ON

From the Editor: I just got off the phone with investigative journalist Penny Marie this morning. We'd been talking about the fall of what used to be called "The Mainstream Media". It's happening before our eyes. It's an

exciting time to be building the plane as we fly it. We also talked about how one can't fight the darkness. it's a bottomless pit. But we can be in our spiritual centre, with compassion, integrity and humour. And this will change the world. The tide is turning, Can you feel it? Read on, for stories that confirm this reality.

Whangarei Council Rejects Fluoridation Directive

Whangarei Council Rejects Fluoridation Directive

In a tense meeting today, Whangarei councilors voted seven to five (with one abstainer) to reject the Director-General of Health's (DGH) directive to start fluoridation. Fluoride Free New Zealand congratulates the councilors for protecting their community from the undeniable harm caused by fluoridation.

Last week the Surgeon General of Florida (population 22 million) advised all communities in Florida to stop fluoridation. He stated unequivocally that "fluoridation is public health malpractice" and he said that putting a neurotoxin in the drinking water was not an answer to dental health. Whangarei District Council is one of 14 councils that was directed by the former DGH, Ashley Bloomfield, to start fluoridation or face severe penalties of up to \$200,000 plus \$10,000 a day every day thereafter if they do not comply. However, the seven councillors that voted against it chose that no amount of blackmail could make them deliberately add a poison to the drinking water that they knew full well would most likely harm many people in their community.

Cr Gavin Benney, in particular, is to be congratulated, for bringing the motion to the council with the backing of Mayor Cocurullo. His notice of motion simply states that "the Whangarei District Council resolves NOT to fluoridate the district's water supply as required by the directive from the Ministry of Health". Cr Benney's action should serve as a shining example of what people need from their local representatives. Someone who will do the in depth research that an issue like this requires, and has the integrity and fortitude to bring the issue to table.

Fluoride Free New Zealand expects that this decision will embolden other councils to also reject

the unscientific and immoral directive being imposed on them by the DGH. The issue will be discussed at the next Nelson City Council meeting on the 5th December. The Horowhenua District Council requested staff bring a advice to them at their next meeting on the 11th December as to what their options are including seeking an Interim Injunction if the DGH were to seek enforcement.

The councilors that voted to reject the directive were Cr Benney, Mayor Cocurullo, Deputy Mayor Halse, Cr Golightly, Cr Ruka, Cr Olsen and Cr Reid.

It remains to be seen what action, if any, the Ministry of Health will take. If the Ministry do take action it will only serve to alert more people to the issue of fluoridation and the that people know about fluoridation the more likely they are to oppose it. Read more [here](#):

Royal Commission Stage 1 Enquiry Results:
NZ Government Covid Response,
"Excuses, Loss of Trust & Doing It Better"
&
Stage 2 Begins

From NZDSOS (*NZ Doctors Speaking Out With Science*):

The New Zealand government covid response had nothing to do with keeping its citizens safe from a “deadly virus”. Phase 1 of the Royal Commission of inquiry (RCI) into covid has ended with the main report released. The terms set out by the previous government were such that the commission in effect provide excuses – “evolving evidence” and “perceived uncertainty” – for the terrible injustices and human rights abuses thrust upon our nation, along with a congratulatory, “little ole NZ did ok”.

While it was not in the Terms of Reference to examine vaccine safety and efficacy, the Commission was unable to ignore this aspect of the covid response fully, in particular in relation to mandates. As we prepare for the more important Phase 2, we are not dissecting this report in depth. However, certain points cannot be left unchallenged, nor can unanswered questions around justification of the response be ignored.

NZDSOS Conclusion of the Royal Commission Phase 1 Report:

The refusal of the last (and current) parliament to consider sufficiently the risks of the covid measures implied a predetermined course of action to vaccinate the entire population, rather than to manage a Coronavirus pandemic in the best interests of its citizens. The lockdowns, the arbitrary determination of “essential” workers, the social distancing, the mask mandates and the censoring of discussion without taking in to account the negative impacts on our society and its economy, all point to a single goal: mass vaccination. This was, indeed, confirmed by the then Director General of Health, Dr Ashley Bloomfield, not just to vaccinate everyone, but to do it come what may, and despite clear and mounting proof of desperate dangers. NZDSOS's full coverage of the report and more of their analysis can be found [here](#):

More on The Royal Commission Report from Ryan Bridge on [NewsTalkZB](#)

“This Covid phase one report – the verdict is in, and it's pretty much ‘guilty your honour’

Trust in our institutions as shot, media took a hammering - and rightly so in some cases - Labour supporters and hysterical scientists and other groups went full militant...

They labelled the protesters a river of filth. We wrote off entire sectors of scientific community in the name of social cohesion - like a pack of rabid dogs attacking a limp lamb. That's what we were: we turned into that.”

This Covid phase one report – the verdict is in, and it's pretty much ‘guilty your honour’.

Fine to begin with, and then they as the single podium of truth basically went too far, for too long. Tell us something we don't know.

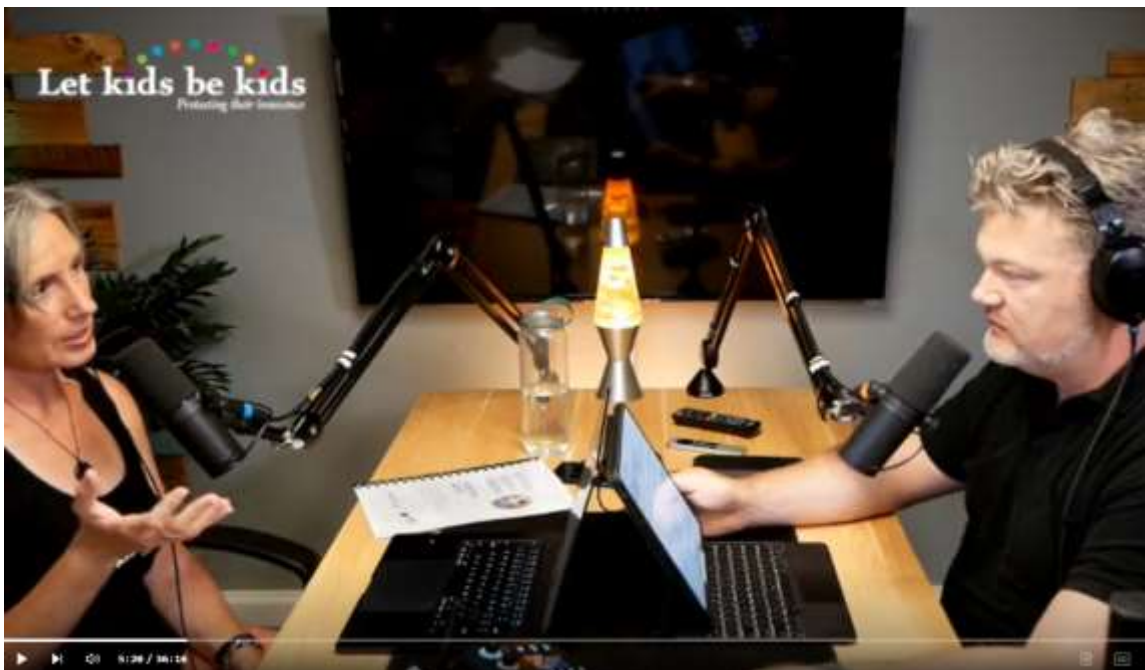

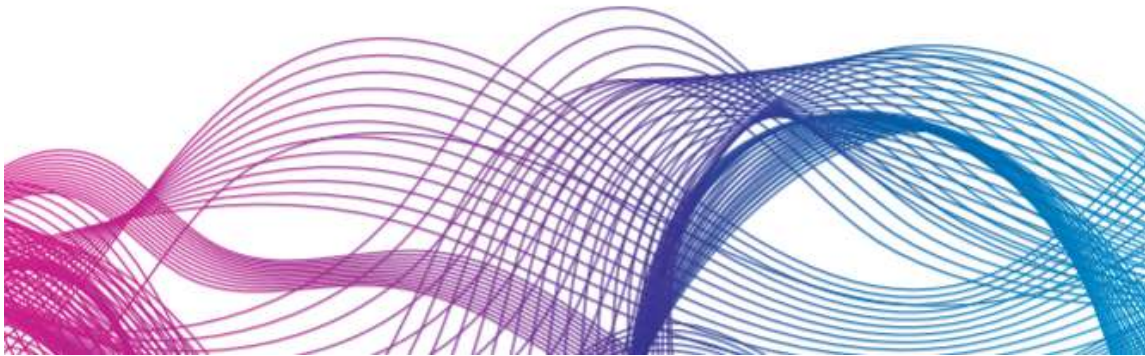

Trust in our institutions as shot, media took a hammering —and rightly so in some cases— Labour supporters and hysterical scientists and other groups went full militant.

I never spoke about the messages I got from some of them during my interviews, challenging old Jacinda Ardern during that period, especially those outside of Auckland during the lockdown to end all lockdowns. They were threats of beatings on my social media, loads of homophobia, I was killing people with my questions, there was hate, there was vitriol. Govt-Funded 'HEEADSSS Assessment' Exposed: 'Relationships & Sexuality Education Guidelines' "Refresh"

RELATIONSHIPS and SEXUALITY EDUCATION

A GUIDE FOR TEACHERS, LEADERS, AND BOARDS OF TRUSTEES

Tuesday 10th December - The government announces how it intends to uphold the coalition promise to REMOVE & REPLACE the current Relationship & Sexuality Guidelines... and Penny Marie of Let Kids Be Kids takes a first look: See her video [here](#).

NZ Govt-funded 'HEEADSSS Assessment' is being used on kids aged 12+ in school, with doctors and more. This is a 'psychosocial' tool.

Are parents aware?

What questions are our kids being asked?

Why are they being asked these questions?

Relationship & Sexuality Education Guidelines will be removed in Term 1 2025

The Government welcomes a new report which confirms the way [Relationship and Sexuality Education \(RSE\)](#) is taught in schools isn't fit for purpose, Education Minister Erica Stanford says.

"In a world that's rapidly changing, young people deserve every opportunity to be equipped with the knowledge and skills they need to thrive and interact positively and respectfully with others. RSE has an important role to play in that."

New research from the Education Review Office (ERO) has found there is too much inconsistency in what is being taught and when, and it often depends on where a child goes to school. For example, the report says more than three quarters of recent school leavers say they didn't learn enough about consent. It also found a third of parents want to change what or how RSE is taught, while nearly a quarter of schools deliver RSE on an ad-hoc basis.

"The report makes clear the status quo is not working for schools, parents or our young people. We want to give teachers certainty in what they're teaching in the classroom and parents clarity on what their child is learning so they can make informed decisions about their education," Ms Stanford says.

The report made several recommendations including the review of the Relationships and Sexuality Education (RSE) Curriculum (2007).

"The RSE Curriculum will be refreshed for the first time in nearly 20 years, in that time society has shifted significantly. The Ministry of Education will convene a group of curriculum writers with expertise in RSE to develop a new curriculum which explicitly lays out what gets taught and when.

"A draft* of the topic areas to be taught will be available from Term 1 with consultation open later in 2025. This will coincide with the current gender, sexuality and relationship-based education guidelines being removed by the end of the first term. This will meet a coalition commitment between National and New Zealand First.

"The report's other recommendations will help inform this refresh. It is critical we give our schools the right tools to deliver high quality RSE. This Government is committed to giving our young people a world leading education that sets them up for success," Ms Stanford says.

An unscientific gender ideology has infiltrated NZ schools. See a 20min video [here](#):

Aly Cook receives ACC approval Letter after 2-yr fight for the truth and justice for her son.

--

Interviews with Dr. Peter A. McCullough

December 2024

[REDACTED]

Dear [REDACTED]

Your injury is covered by ACC

Thank you for your patience while we waited for the outcome of your review hearing. We have now received the reviewer's decision, and they have approved cover for the following injury

- Pericarditis

which happened on 20/01/2022

From [Aly Cook](#) on X:

[After] two years of fighting ACC (NZ's government insurer Accident Compensation Corporation.) .. we won!. My son has Covid 19 Vaccine Induced Pericarditis (as diagnosed by 4 cardiologists and two doctors) and when ACC finally lost against us! After an independent review quashed their decision and ordered ACC to make a new decision. They sent out the approval letter... NOT mentioning the Covid 19 Vaccine!

So that's ACC uncovering another way GOVERNMENT IS HIDING THE TRUE FIGURES!

The date of 'Accident' noted is the vaccination day that ruined my son's life and put him in and ambulance and 7 ED visits since.

Government may be running to cover the truth in New Zealand about the extent of the damage to Kiwis, left in the wake of their poor decisions and forcing people through mandates to take a little tested dangerous product well

Yes you can run but you can't hide !... I AM COMING FOR EVERY SINGLE ONE OF YOU!!! One WIN AND One OIA (FOIA) at a time!

I will fight until I see the vaccine injured recognised and supported in this country and I will force the truth out of you, by your own actions LIKE this approval letter, where purposefully Covid 19 vaccination has been omitted, from being the cause of the accident . The CORRECT DATA is coming out and you will be held accountable!

THATS ALL OF YOU... As the current government is clearly and wilfully hiding the number of serious vaccine injured Kiwis. Read the rest of this post [here](#):

No Silencing Recording Artist Aly Cook--Profile in Valor Kiwi Artist Advances Documentaries and a Mammoth Parliamentary Petition Forcing New Zealand Government to Listen

By [Peter A. McCullough, MD, MPH](#)

I had a chance to sit down with iconic artist Aly Cook who has been an unstoppable force in New Zealand. Her son who is a truck driver is suffering from chronic myopericarditis after taking the Pfizer mRNA COVID-19 vaccine. They have been waiting 14 months to see a cardiologist since there have been so many specialists sidelined for refusing to take the risk of COVID-19 vaccination. Aly Cook is a New Zealand based Multi award-winning songwriter and performer, who has taken her music to the world with a power house vocal and a maturity to that brings out the best in her voice belting out Country Blues and Roots.

NZ's Realty Check Radio Host Wins Court Battle

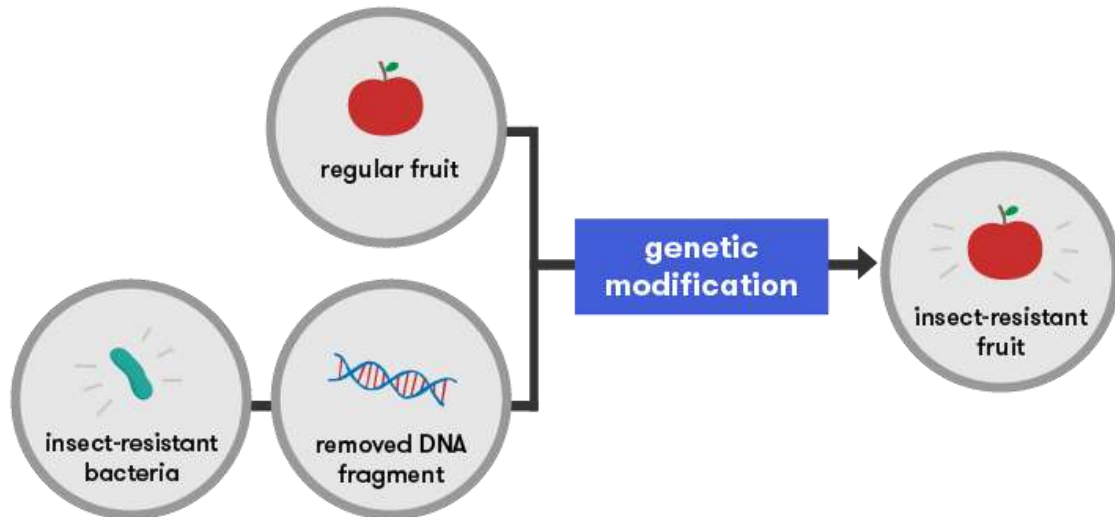

NZ's Realty Check Radio Host wins court battle after armed police illegally raided his home over a political Facebook post

Host of RCR's The Dialogue, Dieuwe de Boer, has won a legal fight against the NZ Police over an armed raid on his home in early 2020. Police raided Dieuwe's home, terrorising his family, in response to a politically motivated anonymous tip-off complaining that he had "far right" views and owned a firearm banned under the Ardern government's new laws. Dieuwe had already disposed of the firearm.

Dieuwe challenged the raid's legality in a drawn-out process that lasted nearly five years. Ultimately, High Court Justice Christian Whata found that the warrant used to search the home was invalid, and that the raid breached Dieuwe's right to be free from unreasonable search.

The judgement followed other cases of politically motivated harassment by police in recent weeks and months. You can read Dieuwe's opinion piece on his blog [here](#): Read the full [Noticer](#) story [here](#):

Judith Collins' New Gene Technology Bill Just Published: Unconstitutional and Problematic?

By [Jodie Bruning](#), for [The Daily Telegraph](#)

The Hon Judith Collins the Attorney General's [Gene Technology Bill](#) has just been published. Collins claims that the Bill will:

'create an authorisation framework to regulate gene technologies and GMOs and manage any risks they pose to human health and safety and to the environment by imposing risk-proportionate conditions'

Collins plans to take a hybrid approach where higher-risk activities will be regulated using a process-based approach, while lower-risk activities will be exempted.

The new regulatory agency would massively deregulate gene technologies and genetically modified organisms (GMOs). How so? A wide spectrum of gene-edited organisms will be automatically exempted from regulation because they are lower or 'minimal-risk'. There is no scientific rationale and policy explaining how 'minimal risk' was decided and how non-regulated organisms were decided. The policy has been cut and pasted from Australia. Read the rest of this story [here](#):

NZDSOS Receives OIA Response: "Covid-19 does not have a particularly high mortality rate nor particularly transmissible"

Document 1

Memorandum of Understanding
between
the Ministry of Health ("the Ministry")
and
the Office of the Chief Coroner ("OCC")

18 March 2020

Background

- A. In January 2020, Chinese authorities confirmed a new type of coronavirus, known as COVID-19. Human cases of COVID-19 resulting from animal-to-human and human-to-human transmission, initially identified in Wuhan, China, have been confirmed in New Zealand and a large number of countries around the world.
- B. Consequently, on 28 January 2020, the Cabinet authorised the Infectious and Notifiable Diseases Order, declaring COVID-19 a notifiable infectious disease. The Order was made pursuant to section 3(a) of the Health Act 1956 and came into effect on 30 January 2020, on the advice and with the consent of the Executive Council. Consequently, health practitioners and laboratories are now required to notify Medical Officers of Health of cases of COVID-19.
- C. On 11 March 2020, as a result of international spread and community spread in some countries, the World Health Organisation declared COVID-19 a pandemic. A pandemic is defined by the World Health Organisation as a world-wide spread of a new disease. As such, the outbreak of COVID-19 is a serious situation that carries implications beyond China and may require immediate international action, including by New Zealand. Any widespread outbreak of COVID-19 in New Zealand could have a big impact on the day-to-day lives of New Zealanders and place considerable pressure on New Zealand's health services.
- D. As of this date, New Zealand has 12 confirmed cases of COVID-19 and no deaths. According to the Director of Public Health, COVID-19 does not have a particularly high mortality rate and it is not particularly transmissible. Nevertheless, the Ministry has set up the National Health Coordination Centre ("NHCC"). It is monitoring the situation closely and will advise of any measures needed for this virus if or when they arise.
- E. The parties have a responsibility to key stakeholders to inform them of the status of spread and death rate associated with COVID-19.
- F. Legal responsibility for dissemination of information from a Coroner's case lies with that Coroner; the Chief Coroner has a strategic role in overview of cases collectively.

In an Official Information Act Response NZDSOS - NZ Doctors Speaking Out With Science has just received, dating back to March 2020, the "Director of Public Health" stated, "Covid-19 does not have a particularly high mortality rate and is not particularly transmissible." This shows there was never any justification for most of what happened next, especially lockdowns, mandates, or any injection at all, let alone experimental and forced. Find more [here](#):

Otago farm remains under strict biosecurity lockdown, 160,000 Chickens 'Depopulated'"

Press Release – [Biosecurity NZ](#)

Situation Update H7N6 Bird Flu Detection Otago – 7 Dec., '24

An unconnected small farm near Dunedin that underwent testing during the week has been confirmed free of HPAI. Continued monitoring and preliminary test results show no infection on 5 other Mainland Poultry properties linked to the Hillgrove farm, ...MPI's chief veterinary officer, Dr Mary van Andel:

Testing and monitoring shows high pathogenic avian influenza remains confined to a single Mainland Poultry property, Hillgrove, in Otago.

An unconnected small farm near Dunedin that underwent testing during the week has been confirmed free of HPAI.

Continued monitoring and preliminary test results show no infection on 5 other Mainland Poultry properties linked to the Hillgrove farm, where depopulation is continuing.

As expected, a third shed on the Hillgrove property has tested positive for HPAI and its 40,000 chickens will be depopulated in the coming days. Read more [here](#):

Warning: Project Everyone Is Not As It Seems

Project Everyone states on their website: AT PROJECT EVERYONE, OUR MISSION IS TO ACCELERATE PROGRESS TOWARDS A FAIRER, GREENER AND MORE JUST WORLD BY 2030. We think it's worth investigating. It has echoes of Schwab's "You'll own nothing and be happy."

Further, they state, "Project Everyone, a United Nations Global Partner for SDG Advocacy and Outreach, seeks to put the power of communications behind the Sustainable Development Goals, also known as the Global Goals." and "The 17 Global Goals are at the core of everything we do – driving awareness and adoption – in order to create a world where extreme poverty is eradicated, climate change is properly addressed, and injustice and inequality are unacceptable." Have a look for yourself [here](#):

WINS OF THE WEEK

Political

Alberta's United Conservative Party government passed a bill this week that bans gender-confused men from competing in women's sports. It's the first legislation of its kind in Canada. On Tuesday, MLAs voted 47 to 33 to pass into law the Fairness and Safety in Sport Act. All of the New Democratic Party MLAs voted against the bill, with all UCP MLAs voting in favour of it. The proposed law will apply to all school boards, universities, as well as provincial sports organizations. The government said that the new rules will also include "legal liability protection for organizations who carry out the requirements of the legislation." - <https://www.lifesitenews.com/news/alberta-passes-bill-banning-men-from-competing-in-womens-sports>

US President Joe Biden is reportedly considering pre-pardons for certain individuals whom a second Trump administration may investigate. Biden understands that accountability is coming. It will be interesting to see who he identifies for pre-pardoning. This will give us a list of who is guilty. - <https://www.theepochtimes.com/us/biden-pardons-39-people-commutes-sentences-for-nearly-1500-post-5775153>

President-elect Donald Trump said this week that he will give Robert F. Kennedy Jr. the freedom to investigate the potential link between vaccines and autism if the latter gains Senate confirmation to become Secretary of Health and Human Services. Kennedy has said for years that autism is likely tied to childhood vaccines. Kennedy has said that he would revamp the NIH

to focus on the causes of autism, autoimmune diseases, and neurodevelopment diseases instead of developing drugs and serving as an incubator for pharmaceutical products. Fighting chronic disease, improving children's health, and addressing corporate influence on government agencies were vital parts of Kennedy's campaign platform when he ran for president. Under the "Make America Healthy Again" campaign, Kennedy intends to curtail what he calls the chronic disease epidemic by addressing the so-called "corporate capture" of federal health agencies and removing toxic chemicals from the nation's food supply, among other objectives.

Telling It Like It Is

A Pride organization has garnished the bank account of a Northwestern Ontario mayor following his refusal to pay a \$5,000 fine imposed for voting against a motion to declare Pride month in his community. Borderland Pride [filed a complaint](#) with the Human Rights Tribunal of Ontario after its request to have June 2020 declared Pride month in the township of Emo was defeated in a 3-2 vote. The tribunal sided with Borderland Pride. The tribunal said the town violated the Ontario Human Rights Code with its "discriminatory" decision and fined the town \$10,000 and Mayor Harold McQuaker \$5,000. The town was also cited for failing to raise a Pride flag, even though the town doesn't have an official flag pole. The discrimination ruling was based on a remark made by McQuaker who said - "*There's no flag being flown for the straight people.*" Seems the Human Rights Tribunal finds it discriminatory to make statements of fact.

- <https://www.theepochtimes.com/world/northern-ontario-mayors-bank-account-garnished-by-pride-group-over-unpaid-fine-5773372>

Five years after a mysterious pneumonia-like illness of unknown origin emerged, many Canadians believe unprecedented government-mandated policies to "flatten the curve" went too far. Thirty-six per cent of Canadians agree with the notion that government reactions to the pandemic were exaggerated according to a recent poll. 41% of men and 32% of women think governments overplayed the threat of COVID-19. The view was also highest among those aged 18 to 24 (40 per cent) and 35 to 54 (42 per cent). Forty-seven per cent of Albertans and 45 per cent of Manitoba and Saskatchewan respondents agreed the COVID response was exaggerated. And while a majority (57 per cent) of the over 55 age group said they did or will get vaccinated this year, only 26 per cent of those aged 18 to 34 said they did/will get vaccinated in 2024. Bioethicist Kerry Bowman states there was "*too much, almost zealotry, related to being vaccinated*". "*The vaccine passports and mandates had a politically polarizing impact, creating an "us-vs-them" mentality.*" "I think (public health officials) should have been a bit more humble." "When we don't know something to simply say, 'We don't know. We're not sure.' If they had said let's hope, which sounds a little soft, it would have been more honest." The most amazing aspect of this survey is that it was reported in the National Post, a mainstream media.- <https://nationalpost.com/health/covid-19-five-years-poll>

As reported last week, the Select Subcommittee on the Coronavirus Pandemic concluded its two-year investigation into the COVID-19 pandemic. In its final report the subcommittee concluded: COVID-19 most likely emerged from a laboratory in Wuhan, China; The W.H.O. caved to pressure from the Chinese Communist Party; Six-foot social distancing was arbitrary and not based on science; There was no evidence that masks effectively protected Americans from COVID; The COVID-19 vaccine did not stop the spread or transmission of the virus; The FDA rushed approval of the COVID-19 vaccine; Vaccine mandates were not supported by science and did more harm than good; The "science" never justified prolonged school closures.

- <https://oversight.house.gov/release/final-report-covid-select-concludes-2-year-investigation-issues-500-page-final-report-on-lessons-learned-and-the-path-forward>

A letter, signed by 77 Nobel Laureates, opposes Robert F. Kennedy Jr.'s confirmation as Secretary of Health and Human Services. Dr James Lyons-Weiler responded with: *"The letter is striking in its lack of substantive engagement with the issues it purports to address. While it leverages the collective prestige of its signatories, it fails to provide a detailed or evidence-based critique of RFK Jr.'s positions. Instead, it relies on vague assertions, appeals to authority, and dismissive rhetoric, leaving its arguments hollow and unconvincing."* He added – *"It is emblematic of a capitulation to institutional inertia rather than a defense of the principles that make science indispensable. They need to question what beliefs and assumptions they are bringing to the table."* These Laureates' silence on critical issues, from regulatory capture and vaccine safety to the ethics of fluoridation and the alarming rise in chronic illnesses, reflects a troubling allegiance to a legacy system of science. This system often prioritizes conformity over curiosity and stability over skepticism, sidelining dissent and ignoring inconvenient evidence. Such an approach is not science—it is an erosion of the very values that have driven humanity's greatest discoveries. This article does not question the accomplishments of these Laureates but instead challenges them to reflect on their role in safeguarding science's integrity. Their decision to dismiss critical evidence without thorough evaluation undermines the credibility of their opposition to RFK Jr.'s nomination. Worse, it contributes to the public's growing mistrust of science as an unbiased arbiter of truth." - <https://popularrationalism.substack.com/p/eight-questions-for-these-77-nobel>

An Australian Medical Icon Breaks Down in Tears Over COVID Vaccine Catastrophe. Professor Ian Brighthope delivered an emotional critique of the COVID-19 vaccination program, describing it as *"the most uncontrolled experimentation ever on humankind."* Dr. Brighthope exposed a disturbing pattern he and his colleagues have observed: an alarming surge in "turbo cancers" linked to COVID-19 booster shots. Dr. Brighthope issued a grave warning: *"There is a potential long-term health crisis waiting to happen."* He called on the government to act urgently. - <https://vigilantnews.com/post/australian-medical-icon-breaks-down-in-tears-over-covid-vaccine-catastrophe>

Citizen Action

The United States and New Zealand are the only countries in the world that allow direct-to-consumer advertising of biopharmaceuticals. During the pandemic, the US CDC and the Ministry of Health in New Zealand began commercials for COVID-19 vaccines. Unlike prescription pharmaceuticals, the vaccine commercials omitted important safety information such as fatal side effects and encouraged patients to bypass their doctors and go directly to vaccine centers. Aly Cook from New Zealand is now biopharmaceutical safety activist. She has put forward a petition to ban direct-to-consumer drug advertising which is deceptive, subverts full informed consent, and adds to the costs of drugs. - <https://open.substack.com/pub/petermcculloughmd/p/petition-to-ban-all-pharmaceutical>

Legal

A federal district court in remote eastern Texas has issued a stunning setback to the efforts create a digital control system. Judge Amos Mazzant just issued a nationwide injunction against the new Federal mandate that more than 30 million Americans report their [personal information](#) to the US government by Jan. 1. The Financial Crimes Enforcement Network, which is a federal agency located near Washington, D.C., is suddenly blocked nationwide from requiring that Americans report their home addresses, birth dates and driver's license numbers to it. Many Americans were unaware of this new federal criminal law, which carries a penalty of two years in prison for non-compliance.

- <https://www.wnd.com/2024/12/deep-state-loses-in-court-orwellian-law-stopped>

U.S. Supreme Court Justice Clarence Thomas this week revived an emergency application to block the Washington Medical Commission from investigating licensed physicians in the state over their criticism of COVID-19 policies. The Washington state commission deems the doctors' dissenting views on the disease

as potentially dangerous misinformation that should be suppressed. The physicians counter that just because they have medical licenses they don't forfeit their free speech rights under the First Amendment. The Dec. 4 order by Thomas was unusual in that Justice Elena Kagan rejected the same application on Nov. 20. The applicants [renewed](https://www.theepochtimes.com/us/scotus-asked-to-block-state-from-investigating-doctors-who-question-covid-19-policies-5772070) their request in a court filing directed to Thomas on Nov. 22. The application was brought by more than 50 medical doctors, as well as Children's Health Defense. Kennedy is also listed as co-counsel on the application. - <https://www.theepochtimes.com/us/scotus-asked-to-block-state-from-investigating-doctors-who-question-covid-19-policies-5772070>

Last week, a Statement in Open Court was [delivered](https://blog.maryannedemasi.com/p/the-finale-of-a-landmark-libel-case) in the hallowed halls of the Royal Courts of Justice in London, marking the end of a landmark libel case. Malcolm Kendrick, MD, and Zoë Harcombe, PhD, both widely regarded for their work in health and nutrition, filed a defamation lawsuit against *The Mail on Sunday* and journalist Barney Calman. Their grievance stemmed from a series of inflammatory articles that accused them of spreading "deadly propaganda" about cholesterol and statins to boost their book sales, thereby encouraging people to abandon prescribed medications and causing significant public harm. However, in June 2024, a pivotal legal development turned the tide decisively in their favour. A judge [dismissed](https://blog.maryannedemasi.com/p/the-finale-of-a-landmark-libel-case) Calman's "public interest defence," concluding that his reporting was not only inaccurate but seriously misleading to readers. - <https://blog.maryannedemasi.com/p/the-finale-of-a-landmark-libel-case>

A federal court last week [ordered the U.S. Food and Drug Administration](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents) to release one million pages of documents related to the Pfizer-BioNTech COVID-19 vaccine, despite the agency's efforts to block their release. The FDA has approximately six months to provide the documents. The ruling stems from a lawsuit [Public Health and Medical Professionals for Transparency filed against the FDA](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents) in 2021. PHMPT sued the agency after it rejected a [Freedom of Information Act \(FOIA\) request](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents) for expedited processing of documents relating to the Pfizer-BioNTech [COVID-19](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents) vaccine clinical trials. In January 2022, a federal court sided with PHMPT, ordering the [agency](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents) to release [internal documents](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents). According to PHMPT, the FDA didn't provide all the clinical trial documents, prompting the organization to file a motion for their release. In an opposing motion the FDA asked the court to release the agency from any obligation to provide additional documents. The Dec. 6 ruling by [U.S. District Judge Mark T. Pittman](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents) rejected the FDA's claim, ordering the FDA to "produce the responsive EUA file on or before June 30, 2025."

Medicine

Students at schools in Arkansas, attended the first day of school in August without their cellphones. The phones are required to stay in backpacks throughout the school day. There are 112 districts that have signed on for Arkansas Gov. Sarah Huckabee Sanders' pilot program to establish "[phone-free](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents)" schools to enhance student mental health and reduce screen addiction. Huckabee Sanders wants schools to act to help clear young minds that are overwhelmed with texts and Snapchats rather than being focused on subjects like English and Algebra.

A new book was published this week, written by the heroic Dr. Paul Thomas and coauthored by DeeDee Hoover. It's titled [*Vax Facts: What to Consider Before Vaccinating at All Stages of Life*](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents). Dr. Paul ultimately had to give up his license in order to go on with his efforts to help parents make truly informed decisions. Far from giving up the fight, Dr. Paul continues to educate and inform, and he now criticizes his own *Vaccine-Friendly Plan* as having been "not friendly enough." In his new book *Vax Facts*, Dr. Paul goes even further in confronting the medical establishment's preposterous contention that every child should receive every vaccine. *Vax Facts* is an essential guide to navigating the decision-making process for any parent reasonably questioning the wisdom of adhering to the CDC's anti-science recommendations. Dr Thomas testified at the NCI hearings in Vancouver. Learn more about the book and how to get a paperback or EPUB edition at [VaxFactsBook.com](https://childrenshealthdefense.org/defender/court-orders-fda-release-million-more-pages-covid-vaccine-documents).

A new study confirms that COVID vaccine shedding is REAL. The study revealed shocking findings: women who were around vaccinated people daily (within 6 feet) had a 34% higher risk of heavy menstrual bleeding, a 28% higher chance of their period starting over a week early, and a 26% higher chance of menstrual bleeding lasting more than seven days, compared to those with little close contact. One of the authors of the study wrote: *“After more than a year of censorship from the medical journals, our landmark study and manuscript has been published demonstrating significant circumstantial evidence that something is being shed from the COVID-19 vaccinated population to the unvaccinated population. It is far beyond time for these toxic injections to be withdrawn from the market.”* Dr. Pierre Kory wrote on X: *“A peer-reviewed study just validated the thousands of shedding reports sent to us.”*

Roy Champtaloup of Arrowtown Uses a Creative Way to Challenge the Status Quo

Join the Big Heart Appeal street collection

Dear Roy,

All it takes is just two hours of your time to join in the fight against heart disease.

Heart disease is still the single biggest killer of men and women in New Zealand, which is why we're calling on you to help make a life-saving difference!

Volunteering as a Big Heart Appeal street collector is easy, fun and has an incredible impact. Connect with your community and share heart-to-hearts with those affected by heart disease, while raising vital funds. The proceeds you help collect help make ground-breaking heart research and world-class training for New Zealand heart specialists possible!

Please, will you gift two hours (or more) of your time on Friday 21st and/or Saturday 22nd February in the Big Heart Appeal street collection?

[Yes! I'll volunteer!]

So many of our kind-hearted street collection volunteers have a personal connection with heart disease. When this devastating condition kills one New Zealand every 90 minutes, it's likely that someone in your life has been affected too.

Five years ago, Daphne was inspired to get involved as a Big Heart Appeal street collection volunteer after her own brush with heart disease.

In 2017, she was diagnosed with an autoimmune disease called sarcoidosis, which sadly caused such damage to her heart that she required an implantable cardioverter defibrillator (ICD). This device is designed to restart her heart if needed.

Just one year after it's insertion, Daphne's ICD kicked in during the middle of the night. For someone who was very active and fit, living with an ICD took some adjusting.

"It's been a rollercoaster with a couple of operations. Being in the cardiac ward on my forty-fifth birthday put things in perspective!" she says.

"I was really excited to volunteer in the Big Heart Appeal street collection," Daphne continues. "It was awesome to speak to so many people and relate to their stories. It's incredible how people open up to you!"

By signing up to join in the Big Heart Appeal street collection, you'll be working alongside other kind-hearted people like Daphne, helping to support life-saving heart health initiatives.

[Sign up today]

It's simple to register. Plus, you can freely select when and where you'd like to volunteer from the list of our available sites. Once you've completed your form, our friendly team will take it from there.

We're so grateful for our incredible volunteer street collectors – the impact of their gifted time can't be understated. Please consider joining us for the Big Heart Appeal street collection today.

Warm regards,

The Big Heart Appeal team

Subject: Re: Did you know a fun day of volunteering can help save lives?

Hi there,

Yes, what a great cause and very happy to assist and contribute.

On two provisos.

1. That your organisation, The Heart Foundation, spends a decent chunk of its marketing budget advising the public of the dangers of the Pfizer Covid 'vaccines' & all mRNA gene therapies, and the irrefutable link to the huge surge in heart disease and fatal heart attacks in New Zealand, with the roll out of the deadly, poisonous jab.

2. That your organisation, attempts to persuade complicit NZ cardiologists & doctors, and their corrupt governing body, MCNZ, to cease and desist immediately from promoting and administering their so called 'vaccines' to their gullible, trusting and vulnerable patients.

These 2 actions would be the most effective and helpful things the NZ Heart Foundation can do to reduce the current surge of heart disease in New Zealand.

Please confirm receipt of this offer and provide me with your thoughts. I am genuinely extremely interested in maybe assisting an effective strategy for your organisation.

And I'm extremely keen to see the end of doctors harming their trusting patients.

I look forward to your response.

PS: I have cc'ed various MCNZ departments and bcc'ed cardiologists & doctors I know who are still promoting the jab and apparently still in denial of the dangers and professional negligence of doing this. I am hopeful I will hear from them to discuss this matter.

Thanks & regards

Roy Champtaloup

Arrowtown

And this just in from Meagan M. (River of Freedom/Reality Check Radio)

"I had two Heart Foundation volunteers in their early '20's show up at my house the other day. I said, "Oh good! Let's have a chat about why heart issues are increasing."

They nodded in agreement that the shots were the problem. I then said, "Well don't get anymore shots!"

The young man then said, "Hell no, I'm not vaxxed!"

The young woman turns to him in shock and says "What? Me neither!"

So I sat them down and said, "We need to talk!"

They have worked together for six months and both had no idea where the other stood on such an important matter! They know how divisive this subject is. It seems very few at this age want to talk about their status. They were ostracised for not getting the injection, so aren't keen for any more conflict. That's just where the kids are at, "Let's just not talk about it.!" We had such a great chat. By the way, I told them I wouldn't be donating until the Heart Foundation started telling people to stop getting shots."

NZ Rising Member Organisation Focus: The People's Health Alliance

The People's Health Alliance
for The People, by The People

How to join and become involved

From our national website, go to the hubs page and join the main telegram page so you can ask health related questions. Join the notices channel so you can find notices and zoom links quick smart while keeping up to date with current info. Then see if there's a local hub near you to join, or, find local like minded people in your area to start a hub. Just ask in the main chat for people who live close to you who are keen to meet.

Information on some of the aspects of the PHA

PHA NZ Social Fund Pot or Angel Fund pot

Some PHA Hubs raise funds to create a social pot. This is a pool of funds that is used to help those within our local community who struggle with ongoing health related issues, and sadly cannot afford the cost of ongoing treatments at this moment.

These treatments, along with nutritional and lifestyle adjustments, helps to support their magnificent bodies to do its greatest work, 'heal itself'!

The Social Pot funds are used to pay our wonderful practitioners, therapists, healers, wellness experts, for the required treatments, that are already being offered to our local community at a reduced cost so the community are able to try different modalities to see which is most affective for them.

Did you know that in the UK, most people who require help with funds from the Social Pot, pay back the money when they can, and/or introduce paying family and friends to the hub to support those offering treatments at the hub.

The Social Pot is just one of the many beautiful examples of community supporting community in action, at your local community facilitated PHA Hub!

How the community could help

When we collaborate with members of our local community, together we create the best ideas. Whilst the community has an opportunity to donate towards the Social Fund Pot at their community facilitated PHA Hub, there are some other ways we can we raise funds to support those within our local community most in need of support and we would love help and ideas for this. What could we do to bring our local community together, to create an opportunity to raise much needed funds and expand the hub to reach more of our community?

We would love to hear your ideas.

Education/information

Each week our national PHA team join forces with the Australia PHA team to create educational zoom interviews with a variety of practitioners and other amazing people who are creating healthier, vibrant communities. We hold these on our Rumble channel so you can access them anytime. Zooms are open to all members each week to listen live and ask questions.

High Lenticulars, Am I Conspiracy Nut?

My son and I saw these uniform lenticular clouds forming on a windy day in Wanaka a few days ago. When I posted the image on our local VFF group chat, one respondent's comment was "[HAARP in Invercargill much?](#)" That gave me pause.

Making America Healthy Again: RFK Jr. Announces Reduction Of 5 Second Rule To 3 Second Rule

WASHINGTON, D.C. — In the latest step in his quest to make America healthy again, incoming Secretary of the Department of Health and Human Services Robert F. Kennedy Jr. announced that the "five-second rule" will now be reduced to the "three-second rule."

Insiders said the initiative was intended to halt the spread of diseases in addition to strengthening Americans' immune systems by only letting them eat food off the floor if it's been there for three seconds rather than the traditionally acceptable five seconds.

"From now on, the time window within which you can eat food off the floor will only be three seconds," Kennedy said. Read the rest of this important story [here](#):

'The View' Ratings Soar After Introducing Ejection Seat, For When Hosts Make Inaccurate Statements

NEW YORK, NY — Following what had been a tumultuous election season and notable instances of panel members having to read legal notes on the air, the rating for The View soared after producers introduced ejection seats for when hosts make inaccurate statements.

The seats were implemented this week as a new feature to deal with the mounting controversy surrounding members of the host panel making inflammatory claims that would later have to be retracted. Under the show's new format, any host found to have made an inaccurate statement will immediately be ejected from the set.

"It's an exciting new wrinkle that will shake things up," said producer Brian Teta. [Details](#):

"I got my covid test back yesterday. It said 50. What does that mean? Also, my IQ test came back positive."

STATEMENT OF PEACEFUL INTENT

At New Zealand Rising we would like to reiterate our position as an organization that is fully committed to peaceful, non-violent action and dissent and to clearly state that we do NOT support or wish to be associated with anyone who is advocating, suggesting or even just implying violent revolutionary change. You can read more about what we stand for in our Guiding Principles.
