WHAT IS NEW ZEALAND RISING?

New Zealand Rising is an alliance of separate groups and individuals from all across New Zealand who believe in a better future. We are many different people with different views, however we all share a common vision for the future.

"We, the people, stand united for a New Zealand that is respectful, includes everyone, and is free of government overreach."

"Kia tūkotahi tātou ō Aotearoa, hei whakarangatira tātou i a tātou. Herea te Kāwanatanga, kia kore e pēhia te mana o te tāngata."

[Our website](#) contains a directory of all groups around New Zealand that share this vision.

Newsletters, past and present can be viewed and downloaded [here](#).

From the Editor:

"Charlie Kirk truly brought light to our broken world. May that light strengthen your backbone and embolden you to walk boldly and live with courage.". Thanks to Leao Tildsley for these words and the supplied image above.

We debated whether to cover Charlie Kirk's death in this issue, as people are probably overdosed. However, we have a perspective to add which you may not have seen. Did you know that within hours of his passing, the US Govt passed some controversial bills backed by both sides of the isle? Oddly enough, our lead international story could have been in the humour section. See the Jim Breuer piece below. And, don't be dismayed, all things can be mended with intention to spread light and love.

NZ NEWS

You're Invited to a NZR Zoom Meeting
Learn About The Gene Tech Bill

The new Gene Technology Bill promises to unlock the potential of genetic engineering to the benefit of farmers, conservationists, and the general public. I'll discuss what makes the Bill different from the current law and how the so-called "new techniques", such as genome editing, are different to what were used in the past. I'll then provide some examples of how the new law and the new techniques create new challenges for farmers, regardless of whether or not they want to grow GMOs. These challenges could result in unwanted trade disruptions like those during the post-cornagate years. Or worse. Hopefully this presentation will help you to decide if the net value of promised benefits exceeds the net cost of possible harms.

To Join Zoom Meeting use this [link](#).

Meeting ID: 874 6332 0168

Passcode: 096450

Join instructions are [here](#).

Health Freedom Court Costs & Keep Fighting

Thank you to everyone who has donated amounts, large and small, to help cover our legal costs. We appreciate every cent and dollar donated.

Despite our [fundraising campaign](#) having been censored, shadow banned and throttled – which has limited our reach on social media – we have received significant support from the public and have reached our cost requirements.

It may feel galling to have to pay legal firm Dentons for their representation of the Medical Council of NZ (MCNZ) and Dental Council (DC), and to pay for the other side's expert affidavit evidence from Dr Helen Petousis-Harris (vaccinologist), Dr John McMillan ('bioethicist') and Dr Matthew Doogue (pharmacologist re Ivermectin).

In addition, there are costs to Crown Law, to be shared with our partners Fluoride Free NZ, on behalf of the Director General of Health...Read more [here](#).

When Truth Becomes a Crime The Good News: People Donate to Fully Pay Medical Council for Witch Hunt Costs

Good People Pay to Fully Cover Witch Hunt Costs from Medical Council of NZ

From: [Alanna Ratna](#)

THANK YOU with all of my heart to all of you absolutely wonderful people out there who so very generously donated to my funding page to pay for my Medical Council NZ fine. In just six days we raised the amount needed. How incredibly amazing that is! Absolutely overwhelmingly phenomenal.

I am deeply grateful to each and every one of you for your generosity and for your beautiful comments.

What a wonderful show of support and solidarity this has been.

And while the MCNZ might think it has won, it has not. The MCNZ has lost and we have won. We have shown the MCNZ up for what it is: A group of ethically compromised, morally bankrupt, arrogant, bigpharma shills.

And we have shown each other what we can do as a group when the need arises: [We] look after each other and stand strong in the face of tyranny.

Thank you to all you wonderful human beings. I love you all.

God bless you.

Alanna

Story Background:

When Truth Becomes a Crime:

The Persecution of Dr Alanna Ratna by the Medical Council of NZ

From: NZDSOS

This week, Alanna Ratna, a doctor who has not practiced medicine for 19 years, was ordered by the High Court to pay costs of almost \$54,000 (\$53,900 plus her own court costs of at least \$13,500) to the Medical Council New Zealand and Health Practitioners Disciplinary Tribunal for daring to have a personal opinion that she gave, *as a mother*, on the covid injection — one that the eminently qualified Dr David Martin and lawyer Professor Francis Boyle describe as a [bioweapon](#). She publicly expressed her opinions on two occasions and on Facebook — all in a so-called democratic country.

Alanna is a devoted mother who rapidly noted the imminent danger of this covid jab that was falsely being touted as “safe and effective” to all New Zealanders, regardless of their medical history, or if they were pregnant, and regardless of the paucity of safety testing. Since the time of Hippocrates the motto in medicine was always known as “First, Do No Harm”. And a cardinal law in medicine has been, since the thalidomide disaster, to avoid giving any risky medications to pregnant women, because of obvious potential harm to the growing foetus within the expectant mother. Read the full NZDSOS report [here](#).

Mary Hobbs has also written an excellent opinion piece in the NZ Daily Telegraph which you can read [here](#).

RIP A Man of Integrity - James Murphy

It is with real sadness to report that James Murphy, Wellington freedom fighter (member of Freedom Alliance and Resistance Kiwi), died unexpectedly at home on Monday.

James was a man of integrity. He strove for the truth, he stood up for what he believed in and was a great warrior. James never shied away from what he believed. He never watered down his beliefs or hid them from anyone yet he still managed to have his friends outside of our freedom community.

During the mandates he was not allowed in to his church or his tennis club. He was ostracised by many, but he stood his ground. He knew right from wrong as easily as day from night.

Since 2021 James attended just about every protest, rally, meeting in the Wellington area concerned with our freedom. He stayed at the Wellington protest and was beaten by the police for it. A man who had never broken a law in his life. He did many acts of resistance by himself often going into pharmacies to question them about the covid jab. He also came to all the parties and was loved by everyone.

This is James on The River of Freedom, and this is James doing one of his many activist events. It is very funny and I am sure that he would be happy that it is being shared widely.

Bryce McKenzie On Injecting Cows With Chemicals To Cut Methane For Climate Goals

Sean Plunket talks to Bryce McKenzie from Groundswell about injecting cows with chemicals to cut methane for climate goals.

One commenter on Youtube aptly wrote, "We are already the lowest emissions country in the world for agriculture and food production is supposed to be exempt

from the Paris Accord. Who knows what effects this will have on cows and us who consume them. Where are the longitudinal trials? Boycott "injected meat." Watch the interview [here](#).

Kim Isherwood Warns of the Dangers of Child Sexuality Education

From: Let Kids Be Kids,

Child Sexuality Education (CSE) is a policy being promoted in schools and the wider education system worldwide. At first glance, it seems innocent enough, even reasonable; it educates children about sex and protects their rights. Right? Unfortunately, not so. CSE is a pernicious and dangerous educational policy which claims it is there to help inform children about sexuality and sexual relationships, when in fact it is a calculated initiative to sexually groom and pervert them. See the interview [here](#).

Stop New Zealand's Electronic Road User Charges (eRUC) Surveillance System Sign the Petition

To: New Zealand Government, Ministry of Transport, Members of Parliament

What's at Stake? The upcoming electronic Road User Charges (eRUC) system will use GPS and digital tracking to monitor vehicle movements for charging purposes. This means the government will collect detailed data on where, when, and how far every vehicle travels—affecting every driver in New Zealand.

Why This Matters:

1. This system builds a massive surveillance framework that risks your privacy and freedom of movement.
2. Data breaches and misuse of such sensitive vehicle location data are real and documented risks.
3. It sets a precedent for linking vehicle tracking with government digital ID systems and Central Bank Digital Currencies (CBDCs), leading to unprecedented citizen monitoring and control.
4. Once in place, reversing this system will be extremely difficult, gradually normalizing constant government tracking.
5. New Zealand's only oil refinery, Marsden Point, has been non-operational since 2022, meaning we fully rely on imported refined fuels subject to volatile global markets.

6. The public has no direct control or say over rising fuel prices, which are influenced by international supply, demand, and geopolitics.
7. The government does not set fuel prices and can impose additional taxes at any time, potentially increasing costs at the pump without meaningful public input.
8. This lack of fuel price control combined with the shift to electronic road user charges raises serious concerns about fairness and financial burden on New Zealanders.

What We Want:

1. Halt the rollout of the eRUC system until thorough, independent privacy impact assessments are done with full public consultation.
2. Enforce strict privacy protections: collect only essential data, minimise retention, and ban data sharing beyond billing. Read the rest and sign this petition [here](#).

Is NZ Sleepwalking into a Future Where Privacy is Erased by Tech?

"We've got to protect the rights of people to privacy and identification... if it was satisfactory in the past, there's no reason why it shouldn't be in the future." — Winston Peters, NZ First Listen to the interview [here](#).

Key US Vaccine Advisory Committee Tells Truth About Dangers of mRNA Injectables

From: Lynda Wharton, Health Forum NZ

While you were sleeping, what was I doing at 4am this morning?

Laying in the dark watching history in the making.

In America, the Advisory Committee on Immunization Practices (ACIP) have been in session over the past 2 days.

This is a key advisory group in America, assessing risks and benefits of various vaccines, and making recommendations (to the CDC) about their use....or not.

You won't hear a single word about this in the NZ press....or from the NZ Ministry of Health, so it's left to freelance journalists such as myself, to inform YOU.

After all, every New Zealander (in fact ever person on the planet) deserves to have ALL the available information pertaining to RISKS AND BENEFITS before taking an mRNA injectable.

To date NOBODY has received this Informed Consent.

That is about to change, and it started with the ACIP discussing (on public livestream) for the very first time ALL the RISKS and MISSING INFORMATION pertaining to mRNA injectables.

Ironically it's the identical list that I have endlessly written about (along with NZDSOS - NZ Doctors Speaking Out With Science) for the past 4 years. Much of the information in the video has been known for over 2 years.

What are the risks and missing information that the ACIP informed the world about today?

1) (seemingly) Permanent immune system changes including: an abnormal increase in IgG4 antibodies - the "tolerising" antibodies that weaken your ability to fight viruses (including Covid), and potentially increase vulnerability to cancer. T cell imbalance also increases infection risk.

2/ BIODISTRIBUTION: mRNA encased in Lipid Nano Particles DOES NOT just stay in the arm. It moves throughout the body, including liver, heart, brain, ovaries, testes.

3) Lipid Nano Particles (and mRNA) CROSS THE SACRED BLOOD BRAIN BARRIER

4) Vaccinal spike protein is NOT gone in days. The most recent Yale University study found vaccinal spike protein PERSISTING 700 DAYS AFTER VACCINATION.

5) Abnormal proteins are produced along with spike protein, as a result of FRAMESHIFTING. We have no idea of the long term consequences of billions of mRNA transfected cells producing rogue proteins.

6)Pfizer mRNA injectables are CONTAMINATED with rogue Plasmid DNA AND SV40 PROMOTER. Both are encased within the lipid nano particles that allow movement into the cell interior. There is the possibility of entering the cell nuclei and genomic integration.

7) SV40 promoter is oncogenic e.g. can potentially drive tumour and cancer formation.

8) Pfizer did NOT inform any drug regulators of the presence of the dangerous SV40 promoter in it's product.

Wanaka Cell Towers Destroyed

From: [Clay Drummond Media Ltd](#)

Drummand's Editorial Note: "According to sources, it was [allegedly] arson."

"About a year ago, when I was passing through Wanaka/Queenstown, I filmed two cell towers in Wanaka and recorded their EMF readings. Last night, those exact

towers were either torched or malfunctioned and completely destroyed. Police are on scene investigating, but the media is silent.

In the last few months, I know of four towers that have gone up in flames — looks like the fire is spreading.

Using my entry grade level TriField EMF tester, I measured readings well over 20,000 — TriField themselves say anything over 1,000 is harmful to the body. Even Google recommends at least a 400-meter safety distance, yet these towers were built right next to homes and apartments.

Video sent in.

I don't condone arson or violence."

You can see the video, and more images on Drummond's post [here](#).

Local Wanaka woman "Louise", had a classic exchange with a local policeman after the event, and you can find it on Mountain Spirit Media's blog [here](#).

Kindness or Optics? This is Your First Look at Jacinda

JACINDA

THE UNTOLD STORIES

100+
interviews

DAVID COHEN
WITH REBECCA KEILLOR

Unauthorised biography by David Cohen with Rebecca Keillor

This is your first look at Jacinda: The Untold Stories, the unauthorised biography based on more than 100 interviews and a year of research. It promises to be the most in-depth account of Jacinda Ardern's leadership yet. Ardern became famous for her slogan "Be Kind." But those close to power saw the gap between image and reality.

"We didn't spend much time debating serious issues in Cabinet. Her kindness rhetoric fed expectations that could never be fulfilled."

"It was a well-honed skill of avoidance — a Betty Crocker recipe of kindness."

"The marketing was in overdrive but the operations almost non-existent."

HYPE OR HORSEPOWER?

Her global profile grew almost overnight.

"Suddenly she was everywhere — magazine covers, TV, the zeitgeist of Labour. It all seemed like it happened instantly." Read more and pre-order [here](#).

Forensic Analysis Challenges Authenticity of Christchurch Attack Video

From: [The Daily Telegraph NZ](#)

Explosive evidence has been released challenging the authenticity of the Christchurch Mosque attack video, which has been banned in New Zealand since 2019.

A new forensic video analysis authored by Gareth Jacobs claims the footage is staged, exhibits "zero victims," and was manipulated using replica firearms and digital editing.

"We make no claims pertaining to what else may have happened on that day, however, what we can say with absolute certainty, is that the video exhibits zero victims and is a staged event," a press release stated. Jacobs served five years in the New Zealand military where he gained weapons-handling and security expertise, and has 14 years' experience as a Digital Forensic Analyst, Read the full story [here](#).

INTERNATIONAL NEWS

Charlie Kirk's Death is Waking People Up

Charlie Kirk's assassination is exposing the spiritual war. Breuer breaks it down.

Editor's note: Within hours of Charlie Kirk's death, the US Congress took the action (among other actions not listed here) to block the Epstein files release.

While we're consumed with Kirk's death, what else is happening? I thought it wise to include coverage on Kirk's death that you might not have seen in an already saturated news-scape.

See Breuer's short [here](#) (and the full version [here](#)). Breuer is best known in recent times for his stand-up piece "[Somebody Had to Say It](#)"

Director Mikki Willis also weighed in with some thoughtful words along the same lines, which you can see [here](#). And lastly, Katherine Austin Fitts spoke [here](#).

The Tide Turns For Robinson, and UK

Tommy Robinson reveals shocking details about his London event. Just 48 hours before it was set to take place, Westminster Council contacted his event company and revoked the licenses for sound equipment, even threatening prosecution if speakers were set up. Robinson says this was a deliberate attempt to provoke chaos in the capital, leaving police and council at odds over enforcement. With video evidence soon to be released, Tommy claims the government is trying to silence him and incite violence instead of protecting democracy. The police eventually overruled the council. One eyewitness stated, "The police were were incredibly relaxed and no one felt threatened," said one attendee. See more [here](#).

Dr. Anthony Fauci Emails Go Public

"Delete After Reading"

Newly released emails show Fauci directed colleagues to “delete this after you read it”—dating back to Feb. 2020. He denied it under oath. These documents are now public, and Fauci will finally testify before Chairman Rand Paul. The coverup began while the virus was barely on America’s radar. Just one day after the Feb. 1, 2020 Proximal Origins call, Fauci, Francis Collins, and Jeremy Farrar plotted how to “get ahead of the science and the narrative” under WHO. Read Senator Paul's post on X [here](#).

Greg:

As usual he s full of s..t. Mark Meadows curiously had to same response and was upset when I said that NY got things right by finally getting the numbers down and successfully began opening up. I will paste in a note I sent to Mark:

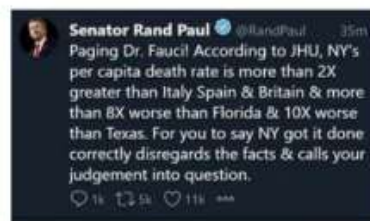

I am sorry, Mark. I do not think you are missing anything and I understand what you are saying, but I guess we are just looking at this from different perspectives. NY certainly made mistakes, but we learned a lot from the difficult experience that they went through that hopefully benefitted cities and states that subsequently got hit. I am just talking about the fact that they got the numbers down and now they seem to be opening safely and successfully. Also, please forgive me because I am not trying to be contrary, but let us look at the numbers. The NY Metropolitan area has a population of 20.3 million. With 32,000 deaths, the death rate at the population level is 0.0016. Miami Dade county has a population of 2,717,000. With 5000 deaths, the death rate at the population level is 0.0018, and they are not out of it yet. And so on a population level Florida may ultimately turn out not to be too different from NY.

Go to

I do not want to engage any more with this nonsense. An so, please delete this e-mail after you read it.

Thanks,
ASF

Trump & RFK Jr. Deliver Major Announcement On Autism

Trump: "I've been waiting for this meeting for 20 years"

President Trump and HHS Sec. Robert F. Kennedy Jr. deliver remarks about a major announcement on autism. Watch [here](#).

And this from the [Childrens Health Defence](#)

"For 30 years, parents of children with autism have been silenced.

40–70% believe vaccines played a role in their child's injury. Instead of gaslighting them, this administration says: We will listen.

Trump stated, "The studies suppressed for decades will finally be done."

"You Were Right About Chemtrails After All"

"Turns out all the crazy cranks & conspiracy theorists who were concerned about Weather Modification & Chemtrails were right after all"

"Here we are in Capital Hill". It's taken a few years - but every person who knew those lines in the sky weren't natural, haven't always been there & that Climate Engineering on a Global Scale was happening have now been proven correct. You were right, you were always right, you always knew you were right & finally we're all being vindicated, as the subject is now being discussed throughout Washington. Watch [here](#).

OTHER NEWS

"Gen Z" Uprises in Nepal

From: Peita McClenaghan, for [CSM](#)

While the West slept, enjoyed their morning lattes, negotiated peak-hour traffic and considered Uber-eats dinner options, a humble, land-locked nation to our north burned.

What began as a student protest, within a single day, ended with the torching of the capital and the capture of a Prime Minister.

A new Nepal will arise from the ashes.

Like many Asian governments synonymous with corruption, Nepal has suffered the loss of Tibet to China and its meagre resources exploited by a so-called democratically elected government.

Education outcomes are poor, development has been slow and the military is financed by China and India while its leaders grow wealthy. It is however the home of the Himalayas, Mt Everest and the legend of Big Foot.

Quietly simmering though, has been discontent brought about by the ever-increasing access to social media, internet networks and a generation hungry for change.

Those families who have supported their offspring to study abroad at universities in Australia and elsewhere have been rewarded for their sacrifices and the new breed Nepalese, astute, educated and world-wise created the perfect storm.

Gen Z responded in protest on Monday when the government began a threatened social media ban.

They took to the streets in their thousands with banners and met with government sanctioned military forces with guns and ammunition.

By the end of the day, 19 young people had died, many high school students in their uniforms. In the evening the military patrolled Kathmandu, now under curfew, interrogating families, forcing entry to homes, incarcerating the innocent, smashing communication devices and beating constituents.

When the sun rose today, Tuesday, the revolution began and by sundown, the Prime Minister had resigned and was captured attempting to escape to Dubai or China, the Parliament had burned to the ground, the Cabinet ministers, their homes aflame, fled the country by helicopter, the International airport was blockaded and shut down and the airwaves scrambled by drones.

The Hilton Hotel was set alight, with people trapped on the roof, lives were lost in the incineration of the Parliament, collateral damage.

The Gen Z revolutionaries began by protesting government corruption and managed to overthrow a government. All in one day. Their future uncertain, the population now speculates what lies ahead while China eyes Nepal's most valuable natural resource, the water flowing down from the Himalayas.

And Gen Z's entire campaign was facilitated and escalated on Facebook, public broadcasting digital networks and various social media platforms, skirting the authorities via VPNs.

Within a mere 5 minutes of posting, messages to mobilise had reached 15000 phones. The level of controlled response to calls to arms was immediate and pin-point accurate. The response was swift and successful.

Within 15 minutes of a post appearing calling for the burning of the Hilton, purportedly owned by the Prime Minister's son, the hotel was aflame. Within two hours of a post's appearance every cabinet minister's home was alight.

And by early afternoon the government had fallen.

It's a sign of the times that a likely candidate to lead the nation's rebirth is a musician and a rapper, the Mayor of Kathmandu, a man of the people.

New ministers will be elected on merit, and the future is bright. The UNHCR has officially condemned the former government for its massacre of young lives and called for an official enquiry. Former corrupt ministers will be tried and convicted mercilessly and a new Parliament will be built.

And hopefully those young lives lost will not be in vain. The world is experiencing unprecedented unrest, and warfare over territory is protracted and costly; trillions

of dollars wasted and hundreds of thousands of lives sacrificed. But in the space of a mere 24 hours, Nepal's Gen Z has mounted a revolution and overthrown a government, armed with nothing more than a social conscience, social media and the Internet.

Candidate Launches Campaign Exposes Questionable Spending \$

Meet Cr. Robert Lee. He is standing for mayor for Rotorua Lakes Council. It's worth a watch whether you are in Rotorua or not, he speaks some common sense and exposes some questionable \$\$\$ See his campaign launch speech [here](#).

Boxing Legend Ricky Hatton, 46, Found Dead at Home in Manchester

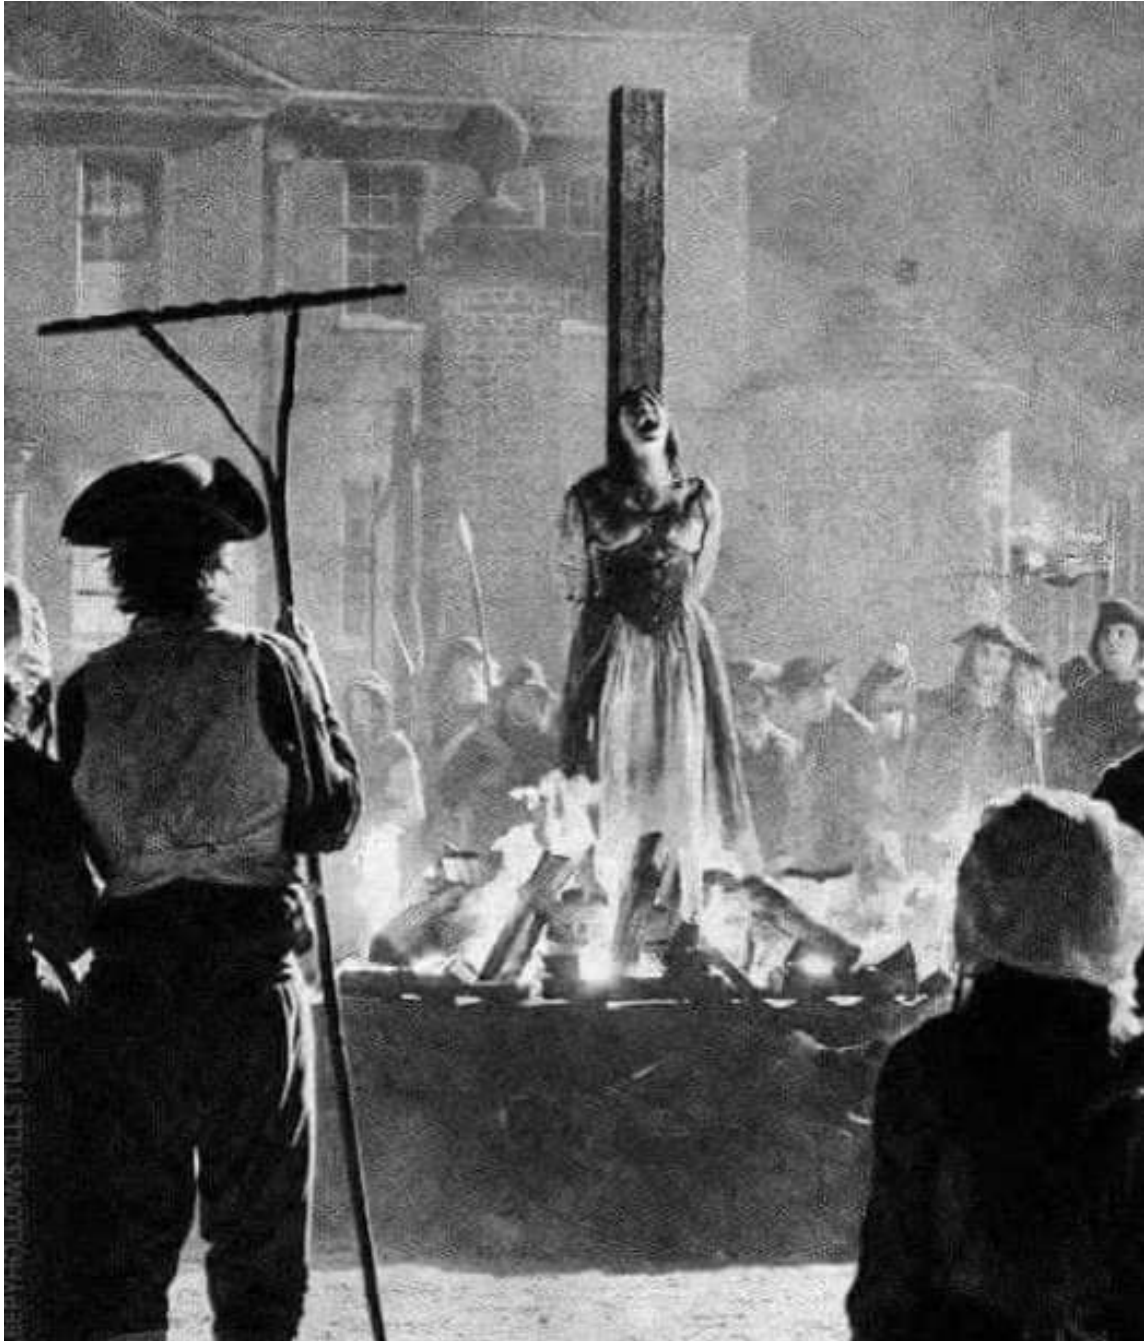

British boxing great Ricky Hatton has died at the age of 46.

Hatton was found at his home in Hyde, Greater Manchester, where a police cordon has been put in place.

Greater Manchester Police confirmed a body had been found at Hatton's address and that the death is not being treated as suspicious.

A GMP statement read: "Officers were called by a member of the public to attend Bowlacre Road, Hyde, Tameside, at 6.45am today, where they found the body of a 46-year-old man. There are not currently believed to be any suspicious circumstances. Read the story [here](#)."

"Where's the Witch?"

My daughter came home from school and said,
"Mum, you're not going to believe what happened in history class today."
Her teacher told the class they were going to play a game.
He walked around the room and whispered to each kid whether they were a witch
or just a regular person. Then he gave the instructions:

"Form the biggest group you can without a witch. If your group has even one, you all fail."

She said the whole room instantly lit up with suspicion.

Everyone started interrogating each other. Are you a witch? How do we know you're not lying?

Some kids clung to one big group, but most broke off into smaller, exclusive cliques. They turned away anyone who seemed uncertain, nervous, or gave off even the slightest hint of being guilty.

The energy shifted fast. Suddenly everyone was suspicious of everyone.

Whispers. Finger-pointing. Side-eyes. Trust dissolved in minutes.

Finally, when all the groups were formed, the teacher said,

"Alright, time to find out who fails. Witches, raise your hands."

And not one hand went up.

The whole class exploded. "Wait! You messed up the game!"

And then the teacher dropped the bomb: Read the whole story [here](#).

CERN Scientist Exposes the Illusion We Live In

Dr. Bernardo Kastrup worked at CERN. He spent years deep inside the world of high-level science and technology. But something didn't add up. Today, he's one of the few respected voices claiming that reality is not made of matter — it's made of mind. According to him, everything we experience is a projection of consciousness, and the physical world is just a mental illusion. His ideas are

shaking the foundations of science — and revealing truths many still refuse to accept. Watch this must see video [here](#).
