WHAT IS NEW ZEALAND RISING?

New Zealand Rising is an alliance of separate groups and individuals from all across New Zealand who believe in a better future. We are many different people with different views, however we all share a common vision for the future.

"We, the people, stand united for a New Zealand that is respectful, includes everyone, and is free of government overreach."

"Kia tūkotahi tātou ō Aotearoa, hei whakarangatira tātou i a tātou. Herea te Kāwanatanga, kia kore e pēhia te mana o te tāngata."

NZR Directory of all groups around New Zealand that share this vision are on [our website](#)
Newsletters past and present can be viewed and downloaded [here](#).

SECTIONS

1. From the Editor
2. News From NZ Rising Member Organisations
3. NZ News
4. NZ Events
5. International News
6. Essential Reading
7. Keeping a Sense of Humour Perspective

From the Editor: "Don't just do something, sit there". Taking action and keeping one's sanity in these times is a balancing act. I almost think the humour section and the header image are the most important part of these newsletters. They bookmark the current events. While the news herein determines our future, it will be dust in the wind. Remembering to smile during the day, staying centered with family and friends and keep up the good work is the core issue. Take action, then step away from the machine, and repeat.

NEWS FROM NZ RISING MEMBER ORGANISATIONS

Who Knew? What Did They Know?

And When Did They Know It?

From NZDSOS:

We are pleased to feature this important contribution from a founding member of New Zealand Doctors Speaking Out with Science (NZDSOS).

I was in the USA when the “novel Coronavirus” was announced to the world in February 2020. All legacy media outlets in the USA incessantly used the word “novel”. I was exhausted with this word after a few days and decided I would find out what was so novel about it.

Immediately, upon a cursory search of the PubMed data base, I found a paper published by Dr J Claude Perez in February 2020 describing the “synthetic origins of the novel coronavirus” (see reference 1). It detailed what seemed to be a gene-spliced bioweapon with fragments of prior infectious agents known as HIV, influenza A and SARS-1. It was clear that that the intention behind this “novel” construct was to make a highly transmissible illness combining the flu and SARS-1, and preferably also make it capable of causing chronic immune suppression and recurring illness. It seemed the bioweapon industry wanted for it to be “the gift that keeps on giving” (to them). So far, the hopes of its developers seem to have been fulfilled and no major penalties have been incurred. Read the full story [here](#).

Discover Local Currency & Decentralized Tools for Community Resilience

From: The People's Good and Farming Alliance

Regenerate Community exists to catalyse a shift toward truly local, circular economies. We believe that when communities control their own currencies, food systems and environmental stewardship, they become healthy, resilient to external shocks and deeply connected to one another.

By combining decentralized digital tools with grassroots organizing, we help neighbourhoods create mutual aid networks, launch local complimentary currency, raise equity, coordinate food production, and regeneratively restore the ecosystems they depend on — all governed transparently by the people who live there. Learn more [here](#).

Professor Michael Baker's Flu Vaccine Claims: The Evidence He Isn't Discussing

From: NZDSOS

Professor Michael Baker has been all over New Zealand media this winter, warning of record high deaths in the worst flu season in a decade and promoting the flu vaccine as protection

against heart attacks and strokes. But the research he cites is weaker than his messaging suggests, and the modifiable risk factors he ignores are stronger. And there is theory and evidence to suggest our immune-injured population is uniquely vulnerable. Read more [here](#).

Patents, Pathogens and Profits: Organised Crime and Biowarfare

From: NZDSOS

The covid era has exposed a litany of organised crime within the systems that most of us once trusted as being grounded in legitimacy and integrity. None more so than the structures that our health care and research systems are built upon. Here, we take a look at the patents system being used by corporate executives, public officials and the “experts” they finance, to exploit and commoditise humanity (as well as the animal and plant kingdoms). Read the full story [here](#).

NEW ZEALAND NEWS

UNZ: "The Cost Of Living Crisis Ends Here"

Editor's Note: A new organisation called Unite New Zealand are on to something important. They may just have what it takes to make real change. From their website:

"We believe in progress, but to progress democratically through our enduring Constitution of New Zealand."

The Constitution of New Zealand

To Define, Confine and Refine the structure of government.

New Zealand does not have an existing single and complete written constitution that we can each hold in our own hands. We must therefore clearly define, confine and refine our government to prevent further oppression and protect from suppression of our pre-existing rights and freedoms.

By the people, for the people, for our children's future. You can learn more from their well-thought-out website [here](#).

A Message to NZ From Mel Gibson

From: GE Honesty

Thank you, Mel Gibson, for shining a light on an issue most New Zealanders haven't even heard about.

Three bills are rewriting the rules around gene technology, GMOs, agricultural biotech and what can enter New Zealand's farming system.

- Gene Technology Bill
- HSNO Amendment Bill
- CCVM Amendment Bill

Put simply, the rules governing what enters NZ farms, animals and our food system are. See more [here](#).

From: POW, Protest of the Willing
Planning for a NZ-Wide Protest

Planning for a New Zealand-wide protest if the incoming government continues with the deregulation of GE. If you are interested in being actively involved in organising this, please let Tracey B know.

From POW, Protest of the Willing collection of groups. For more info:

Speaking Up Against GE in NZ

By: Mark Toomer

Wellington - About 30 people turned out to an event at Parliament on Wednesday to encourage voters to consider the issue of gene technology when voting in this year's election. Speakers, including New Zealand First MP Mark Patterson and Green MP Scott Willis, spoke against the Gene Technology Bill and the Hazardous Substances and New Organisms Amendment Bill, which would end New Zealand's 30-year-ban on gene engineering outside the laboratory.

One of the speakers Tracey Buick says the event, Don't be a Mad Cow—Keep NZ GE-Free, also celebrated the fact that both bills have stalled and are currently way down on the parliamentary order paper.

Tracey says there are plans for a New Zealand-wide protest if the incoming government continues with the deregulation of genetic engineering. If you are interested in being involved in organising this, please let her know. Contact her at traceybabundance@gmail.com or Mob: 020 410 75103.

When Uncertainty Became Certainty

By Andrew Bell, Doctor's Tales

What happened to the questions that were still open when New Zealand approved the Pfizer vaccine?

In January 2021, Medsafe was considering Pfizer's application for its new mRNA COVID vaccine. The trial result was impressive: about 95% efficacy against symptomatic COVID-19 in the short follow-up period after the second dose.

But much remained unknown.

Long-term safety was unknown.

Duration of protection beyond a month or two was unknown.

Evidence of protection against severe disease was limited.

Evidence was limited or absent for some populations.

Pregnant women had not been included in the clinical trial programme.

Whether vaccination prevented transmission had not been established.

Carcinogenicity and genotoxicity studies had not been performed.

Read the rest of Andrew's piece [here](#).

NZ: Monsanto Is Up To No Good

The APVMA are to make a decision about a herbicide to replace glyphosate. Bayer have submitted an application and it is expected to roll out in 2028.

It's called Icafolin and it's made by Bayer Monsanto, who are the producers of Round Up (glyphosate). Does this mean they are admitting glyphosate is causing cancer? Or can they just see the writing on the wall because the pressure is mounting and they want to make some money for a little bit longer? Really milking it while they can. See the post [here](#).

Ardern Snaps Up \$6.5m Home in Sydney

Mobile Speed Cameras: 12 Adjustments In Past Year

By: Jacob Jones NZ Herald

The country's 10 mobile speed camera trailers have been vandalised at least 18 times since they were rolled out in September last year. Data released to Newstalk ZB under the Official Information Act shows between September last year and this August, cameras have been graffitied 11 times, tyres on a camera trailer have been slashed once and cameras and trailers have been damaged in other ways six times. - People's Health Alliance, Bay of Plenty Community Cuppa

This month, we have Leah McBey talking about her book 'Woman Who Carry Light' a spiritual awakening guide for woman who sense there's something wrong with the world! Leah hopes to have physical copies of her book available for \$20.00 cash purchase on the day.

Location: Mount Community Hall – Lounge Room, 345 Maunganui Road, Mount Maunganui.

Date/Time: Friday 25th September 2026 – 10am – 12noon Entry: min \$5.00 Koha

- Holistic Health Market' Tauranga Central.

This month it's our birthday and we are bringing 'PHA-BOP Holistic Health Market' to Tauranga central. Location: Tauranga Hall, 165 Elizabeth Street, Tauranga Central

Date/Time: Saturday 26th September, from 12 noon – 4pm

Entry Cost: Donation (to help cover costs)

INTERNATIONAL NEWS

And Now for Some Good News Iran War Leads To Fluoride Shortages

By: Zachary Stieber The Epoch Times

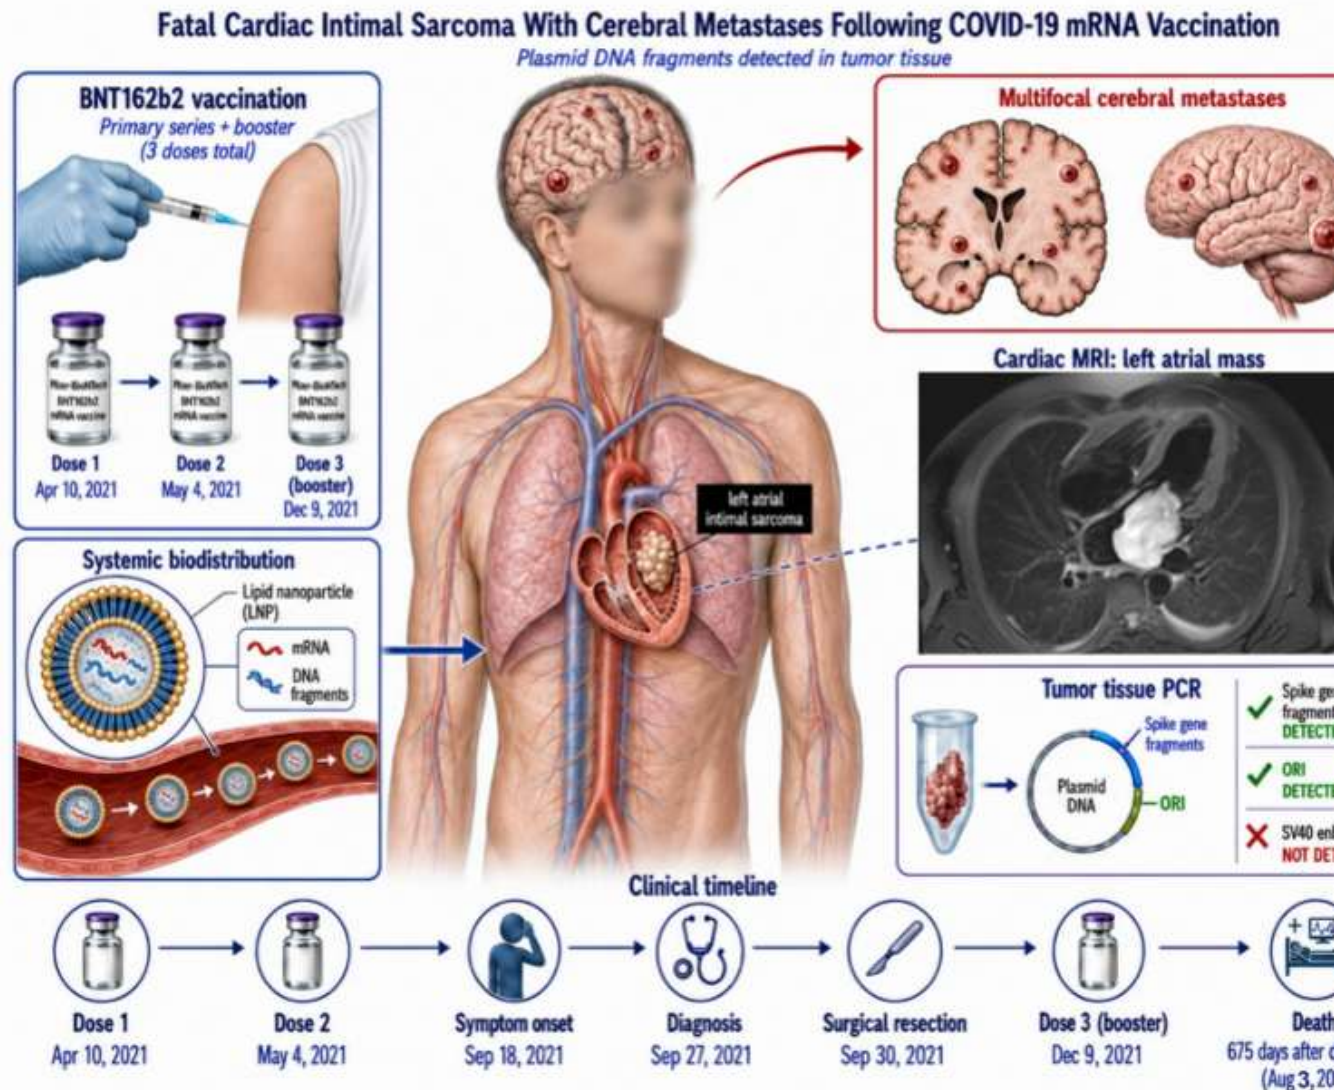

Multiple water providers have lowered the amount of fluoride they add to water for millions of Americans, amid shortages stemming from the U.S.–Iran war.

The Baltimore City Department of Public Works said on April 13 that it is reducing the level of fluoride in their water supply. The move, officials said, was driven by disruptions to the supply chain caused by the ongoing conflict in the Middle East. A key Israeli supplier, specifically, has been struggling to meet demand. “This is an adjustment driven solely by supply availability,” Matthew Garbark, director of the Baltimore City Department of Public Works, said in a statement. Read the good news [here](#).

Breaking Study: Pfizer COVID-19 “Vaccine” Plasmid DNA Found Inside Lethal Turbo Cancer of the Heart

Fatal Cardiac Intimal Sarcoma in a 35-Year-Old Male Following COVID-19 mRNA Vaccination: Plasmid DNA Fragments Encoding the S-Protein Detected in Tumor Tis

Nicolas Hulscher, MPH^{1*}, Claire Rogers, MSPAS, PA-C¹, Breanne Craven, PA-C¹, Kirstin Cosgrove, ECCR¹, M. Nathaniel Mead, MSc, PhD¹, John A. Catanzaro, NMD, PhD², Peter A. McCullough, MD, I

From: Nicolas Hulscher, McCullough Foundation

We document a previously healthy 35-year-old man who developed a hyper-aggressive heart cancer within 170 days of Pfizer injection... and vaccine spike DNA was found inside it. For years, turbo cancer has been dismissed as a “myth.” This new study **TERMINATES** that false claim. The patient had no personal or family history of cancer and no identified hereditary cancer predisposition. Just 170 days after his first Pfizer dose, his doctors discovered a massive tumour filling the left atrium of his heart along with multiple brain metastases. Read this story [here](#).

AI - The Optimistic View

Anthropic's Chloe Lubinski Explains How AI Works (In 14 Minutes)

As AI races ahead faster than our institutions can keep up, one question matters more than ever: what kind of future are we building?

At ARC 2026, we were privileged to be joined by Chloe Lubinski of Anthropic, who explored why AI may be more human-like than we realise, why the "character" of these systems matters, and why our moral imagination could shape the future of intelligence itself. See Lubinski's talk [here](#).

Hackers Got Inside a Flock Camera. Data Shows How System Really Works

A hacker ripped down a Flock Safety camera above a roadway, made a near-complete copy of the data stored inside it, and shared the files with journalists, revealing in new detail how exactly Flock's cameras track the movements of both vehicles and people. The hackers tell

404 Media and WIRED they are also publishing details on how they managed to... Read the rest of this article [here](#).

State Media Exposed

Former CBC producer details news manipulation at Allison Inquiry

What happens when public broadcasting shifts from objective journalism to state-aligned messaging?

In this testimony at the Allison Inquiry (Day Four, 11 September 2026), veteran investigative journalist and former CBC producer Rodney Palmer delivers a critical analysis of Canada's state media. Drawing on over 20 years of newsroom experience, Palmer outlines key moments, internal editorial standards, and how media coverage evolved during critical national events.

Jimmy Dore on 911 & Zionism, Dead End Political Solutions, and What We Can Do

"Keep Asking Questions"

From: Derrick Broze talks with Jimmy Dore of The Jimmy Dore Show about the 25th anniversary of the 9/11 attacks. Jimmy discusses how the Zionist lobby has influenced Trump, why politics is corrupted and can't save us, and what we can do about it. See more [here](#).

The UK Is Under Attack

Ricky Gervais has had enough of the powers that be as illegal migrant protests take to the streets. See powerful testimonies and Gervais' post [here](#).

The Great AI Debate: The AI Labs Are Lying

Ed Zitron, Roman Yampolskiy, Nate Soares and Andrew McAfee discuss the risk of AI. This debate brings together four distinct voices at the forefront of the artificial intelligence revolution: Watch [here](#).

From: Alia Bee (VFF Founder) on FB
A year ago today, I watched that awful footage of something I wish had never happened. Like many, I remember exactly where I was and the disbelief I felt. There hasn't been a day since that I haven't thought about Charlie.
He was a special human. I deeply admired his rare ability to sit across from people who profoundly disagreed with him and just talk. He genuinely listened and challenged respectfully and with grace, even when the person opposite him was losing their rag. Of all his words, these are the ones I keep coming back to.
Keep asking questions.
All the time. In every situation. Especially when your spidey senses are tingling and your bullshit detector is dinging.
Rest in peace, Charlie. The world is not the same without you. See Alia's post [here](#).

1975 Movie Predicts AI

His Lucky Numbers Were 9 And 11

Social Media Security New Reform to Stop Online Abuse

From: Catherine Austin Fitts
The conspiracy theorists tried to warn you.
Australian citizens will require 100 social
credit score points from their digital ID to use
social media with the police having access to
ALL accounts, including private messaging.
More [here](#).

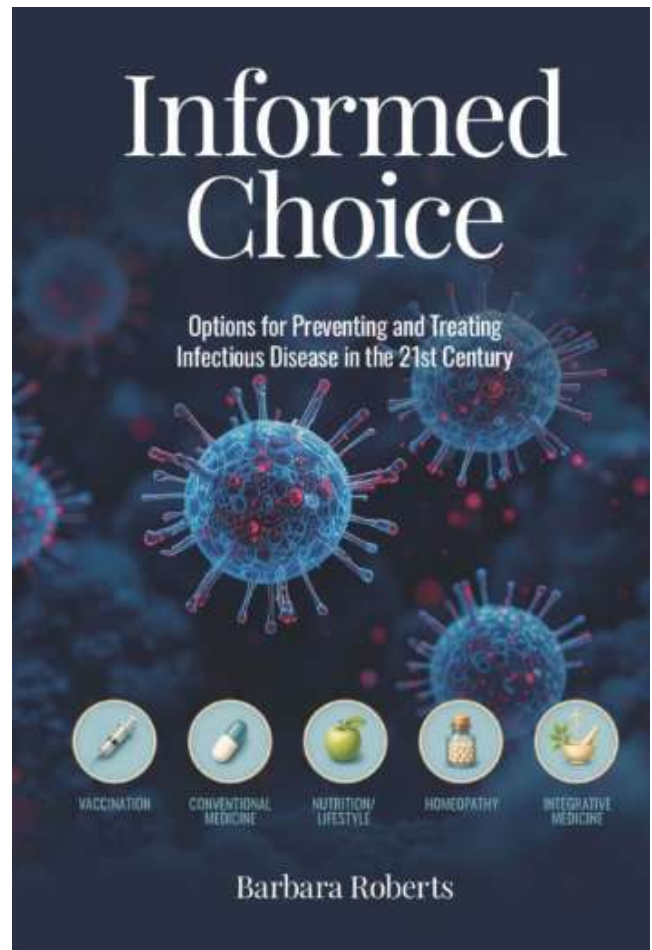

Essential Reading & New Releases

Essential Reading

The fact that we live in one of the most unequal societies in the history of the world is becoming common knowledge. And while lists of “richest people in x country” may be easy to come by, how much do we really know about the billionaires who sit atop our global economic system? Who are they, *really*? How did they accumulate their ill-gotten gains? And what kind of depravities do they use to maintain their positions?

NZ New Release

Informed Choice provides a balanced exploration of infectious disease prevention and treatment, bringing together conventional medicine, integrative healthcare, and homeopathy into one accessible resource. Drawing on scientific research, clinical experience, and a commitment to informed decision-making. More on this book [here](#).

Keeping A Sense of Humour Perspective

You Don't Believe In..?

Be ready with your decision:

"I was going to join the debating team, but someone talked me about of it."

RFK Jr. Teams Up With Starbucks To Introduce New Beef Tallow Spice Frappuccino

WASHINGTON, D.C. — HHS Secretary Robert F. Kennedy Jr. announced on Monday that he was teaming up with Starbucks to create a bold new Beef Tallow Spice Frappuccino as a healthier fall option for consumers.

Starbucks announced the new Beef Tallow Spice Frappuccino would replace the classic Pumpkin Spice Frappuccino immediately in an effort to help customers avoid unnecessary sugar and maintain a healthy lifestyle. Read the news [here](#).

STATEMENT OF PEACEFUL INTENT

At New Zealand Rising we would like to reiterate our position as an organization that is fully committed to peaceful, non-violent action and dissent and to clearly state that we do NOT support or wish to be associated with anyone who is advocating, suggesting or even just implying violent revolutionary change. You can read more about what we stand for in our Guiding Principles.
