WHAT IS NEW ZEALAND RISING?

New Zealand Rising is an alliance of separate groups and individuals from all across New Zealand who believe in a better future. We are many different people with different views, however we all share a common vision for the future.

"We, the people, stand united for a New Zealand that is respectful, includes everyone, and is free of government overreach."

"Kia tūkotahi tātou ō Aotearoa, hei whakarangatira tātou i a tātou. Herea te Kāwanatanga, kia kore e pēhia te mana o te tāngata."

NZR Directory of all groups around New Zealand that share this vision are on [our website](#)

7. Keeping a Sense of Humour Perspective

*From the Editor: **Putting One's Self Out There, in Truth and a Smile***

Someone just started renting our yurt (Mongolian-style shelter). It turns out, he's been with us on our journey of VFF meetings during the lockdowns. We hadn't seen him since those days. When we sat down to sign the lease, he mentioned how he and his wife were undecided about "the whole vaccine thing" and, wondering if they were the only crazy ones. Then, they saw a 120 people in one room feeling the same way and having the same experience. It was a turning point. He said, "You may have saved someone's life in my family, by doing what you guys did at that time." I replied that we were just standing in our truth. There wasn't another option. Oddly enough, yesterday, I decided to wear my "I Will Not Comply" cap today even though I was showing our sleepout for rental to a young couple. When they saw the cap, they said, "Nice hat - we're in VFF". Our lead story is someone who consistently stands in his truth and is a national treasure. Read about Dr. Shelton below. When we stand up and speak our truth, the results can be surprisingly successful.

NEWS FROM NZ RISING MEMBER ORGANISATIONS

Dr. Matt Shelton of NZDSOS

By: Mary Hobbs, From RCR and Daily Telegraph, NZ

Image Credits: Main Image: Mary Hobbs, Insert Image: Randall Richards

"Unarmed truth and unconditional love will have the final word in reality. This is why right, temporarily defeated, is stronger than evil triumphant." Martin Luther King

On 30 September 2026, Dr Matt Shelton is scheduled to appear before a Tribunal in Wellington. Not for a well-deserved medal of honour, but for alleged misconduct charges

that may result in de-registration as a doctor. The tribunal is expected to take just over two weeks.

Dr Matt is the last of a key group of doctors from New Zealand Doctors Speaking Out with Science, (NZDSOS) called before the Health Practitioners Disciplinary Tribunal (HPDT) for

daring to tell New Zealanders the truth and caring enough to warn them about the serious dangers of taking an experimental gene-tech therapy injection – erroneously labelled a “Covid vaccine” – that had minimal, if any, testing and was neither safe nor effective. Read the rest of this story [here](#).

And learn more below from the following stories:

From: NZDSOS via Email:

Hearing Underway

Dr Matt Shelton's two week Health Practitioners Disciplinary Tribunal hearing is underway in Wellington. NZDSOS members send our love, thoughts and support to Matt as he continues through the hearing until Friday 16 October.

Show your support, send him a message or even [attend the hearing](#) if you are in Wellington. Let's show him there is a powerful network of people standing behind him.

Dr. Matt Shelton in the MCNZ Crosshairs

The Mafia strikes again, but it is a spent force

By NewZealandDoc on Substack

I have written many times about the Medical Council of New Zealand and the witch hunt they have conducted relentlessly against virtually every doctor who had the temerity to stand up for true medical principles against the anti-scientific and anti-human covid juggernaut here in New Zealand. The MCNZ has harassed, harangued and persecuted many colleagues, and destroyed their official medical careers. Read the rest of this story [here](#).

Speech in '24 by Matt Shelton at NZDSOS'S Safe and Effective Roadshow

By: Randall Richards, Mountain Spirit Media's Blog 2024

Matt is always a riveting speaker and he delivered, and again, in Queenstown. He started his talk by saying “There were a number of red flags when the vaccine was first rolled out” which got his attention. “The banning of HCQ, Ivermectin, Artemisia, and that there was no need to ascertain cause of death, throwing out accepted pandemic management principles, and the abandonment of medical standards, and fiduciary obligations such as:

- Do no harm
- Informed consent, freely given,
- Right to decline
- Protect the unborn and the mother,
- Considering fertility, cancer and birth defects”

Pandemic Profits: Crowdfunding Platforms and Their Impersonators

By: NZDSOS Media Team

Poverty and Medicine

The connection between poverty and ill health is well established in poor nations, where poverty increases the risk of illness and injury, which in turn limits the individual's ability to earn an income whilst simultaneously increasing the need to pay for medical care. Across the globe many millions live with crushing debt caused by medical costs, often relating to preventable conditions, and very often relating to medical error.

Prevalent in the vaccine injury testimonies at [Canada's Allison Inquiry](#) in Ottawa from 8-11 September 2026, was the experience of impoverishment caused by loss of income combined with unaffordable health care costs. As medical doctors working with the vaccine injured, we can confirm a similar trend amongst New Zealand's vaccine injured. Read the whole story [here](#).

Data Centres with a 15–25-Year Life: Plan in Haste, Repent at Leisure

Key policy advice is withheld as confidential and 'free and frank'. But as major infrastructure decisions are shaped behind closed doors, who is giving the advice?

Data Centre Governance: PSGRNZ's Official Information Act Request Series
PSGR.org.nz, October 1, 2026.

New Zealand seems to be moving rapidly towards much larger data centres, expanded cloud computing, AI infrastructure and a more interconnected digital state. Yet these developments are being managed by different government sectors, each responsible for only part of the picture. Read more [here](#).

NEW ZEALAND NEWS

New NZ Legal Case: "Were Covid Vax Legal Requirements A Justified Limit On Young Person's Right To Refuse Medical Treatment?"

Ashley Beulink in Dunedin Hospital's emergency department in February 2022 after having chest pain following her second dose of the Pfizer vaccine.

From: NZ and the MRNA on X

This new case, taken by NZ lawyer Tudor Clee, will be one to watch carefully.

If successful this may set new precedents surrounding vaccination, vaccine passes and mandates.

The case is in the name of young Ashley Beulink, who was aged only 14 when she took her first and second shot of Pfizer mRNA Covid injection.

Why?

Because the vaccine pass system required her to take two doses to keep her life functioning...to take part in social and sporting events. When you are 14 this feels IMPORTANT.

In February 2022, following her second dose of Pfizer she developed chronic remitting Pericarditis.

It's the first legal case since the NZ Royal Commission revealed that expert advice relating to the interval between doses for young people....or even if a second dose should be given, due to Myocarditis risk...was NEVER MADE PUBLIC, or delivered to ministers in a timely way.

See the post [here](#).

Power is Organised, The Public Should Be Too The Election Will End, The Lobbying Won't

A new initiative from Erika Harvey who has been investigating the marine precinct in Tauranga and other misdeeds of the council there.

From: Lobby for Good.nz

Can We Actually Build Something That Has The Public's Back? Different issues keep producing surprisingly similar questions. How did this happen? Who actually made the decision? Who was responsible for checking it? And where do you go when the answer does not really answer the question?

We are testing whether everyday people can build enough independent capacity of their own to keep following those questions.

How Lobby For Good Works

Democracy gives people a voice. Influence requires infrastructure. LFG helps people understand what is happening, use public processes that are open now and read cases based on public records. Private information is not automatically published or turned into a public action.

This is not about finding 1,000 people who agree with us. It is not a mandate to speak for everyone. It is about public backing to build something people can actually use. See their inspiring website [here](#).

Again, Ministry Of Health Is Stirring the Pot on Natural Health Remedies

From: MOH's Webpage

"In September 2026, the Government agreed to engage on the objectives, principles and core elements of a regulatory system for natural health products.

The Ministry of Health is now seeking feedback on the design of a future regulatory system for natural health products. No decisions have been made on the final design of the system, and your feedback will help inform future policy advice and decisions..

In the words of Dr. Rene Monchy, a member of NZDOS,

"Every few years they do this, to tighten the screws and restrict people's freedom to chose their remedies and to look after their own health, "in order to protect the public". We've been here now many times? And this will continue until enough people stand up. They will not listen to the 'health care providers' , but patients = votes. See the MOH webpage on their consultaion reachout [here](#).

The Importance of Community Groups Succeeding In Web3

Editor's Note: I've known Harald for six months. Half of the time, I'm not quite sure what he's talking about, and I'm not sure I agree with everything he puts forth, I do know he does his research, has a great son, and an optimistic sense of humour. Others were challenged by our stance on the Covid shot and I welcome a challenge to my current paradigm (on crypto and WorldCoin in particular), and then use my cognitive discernment to make up my own mind. Mr Bettin is a clever guy and community oriented, so I thought his story is worth covering. Pictured above is Harald and his homeschooled son, Matt in Wanaka, doing their research.

By: Harald Bettin

In the next 12-24 months we are living through the transition from Web2 to Web3, and it's happening faster than any human brain can comprehend. The pace of change will disrupt almost all businesses, communities, families and individuals.

Community groups are our most valuable asset when any disruption hits, whether that's a virus, fuel shortages, global unrest, climate events or natural disasters. Your society is fragile. Only strong community groups can build up real resistance by working better together. Their (community groups) value and importance still isn't sufficiently appreciated. That's why I believe community groups need to adopt faster and be among the first organisations in their regions that fully adopt Web3 technologies and opportunities and become resilient to change and more effective in their impact.

Places and knowledge for growing food and sustainable infrastructure that can reach people cannot be designed in a crisis. It has to be built into the community long ahead of time. Read the rest of this document [here](#). You can see Harald's X feed [here](#).

Where's The Investigation?

Meagan McNamara puts author and journalist Nicky Hager's investigative credentials under the microscope. He went to Freedom Village during the Wellington protest himself. What did he find? Misinformation. So, where was his investigation? See her post [here](#).

Hey Christchurch Airport Stop Wasting \$\$\$

An industry has been created. It has very little to do with the actual meaning of 'diversity', 'equity' or 'inclusion' - and more people realise this.

Follow The Money and hold elected representatives accountable. Taxpayers and ratepayers, make your voices heard. More info [here](#).

- Camphill Coffee Closing Day 23rd Oct Hawea Flat, Wanaka After six years of providing freedom-lovers a safe harbour and community spirit, Leanne Harling closes her doors after going to court numerous times, and being shut down because she preferred to run as a private club. The QLDC Council has spent countless hours and money picking on Leanne and her coffee-cart.

If you're in the neighborhood stop in on her last day.

- Our Last Tuesday Acoustic Freedom Music Session on 20th Camphill Coffee 10:am Local Freedom muso's will be playing our last gettogether. Tuesdays had been the freedom community's traditional gathering day there.

INTERNATIONAL NEWS

The Government's Manipulation Manual A Comprehensive Guide to Censorship Indoctrination

By: Dr Gary Sidley, HART, Health Advisory and Recovery Team

In May 2026, a Government-commissioned paper was published, titled 'False and Misleading Information: An Evidence Summary and Map for Policy and Practice'. Despite its relatively benign heading, it reads like an instruction manual to enable state control of the population's beliefs and behaviour and, as such, is arguably one of the most chillingly authoritarian documents to be considered by the political leaders of a supposedly open and democratic society. Read the full story [here](#).

The Shift Happened Gradually, Then All At Once.

By: Tyler Durden

The Hunger Margin: How Intel Analysts Learned To Measure The End Of Abundance

By late 2024, analysts at Langley and Fort Meade who had spent careers tracking terrorist cells and nuclear programs found themselves redirected to spreadsheets showing fertilizer shipments, satellite passes over Ukrainian wheat fields, and soil moisture readings from the Sahel. Nobody had issued a memo announcing the change.

It simply became obvious that agricultural data had become national security data, and that the old distinctions between threats to the state and threats to the food supply had collapsed into a single, uncomfortable reality.

The numbers they confronted were not abstract. 266 million people facing crisis-level hunger or worse - not "food insecurity" as bureaucrats define it, the anxiety of choosing between rent and groceries, but the physiological reality of bodies consuming muscle tissue to keep hearts beating. 1.9 million perched on the absolute edge of famine, the IPC Phase 5 designation that translates, in plain language....Read the rest of this compelling story [here](#).

Stillbirths After Shots

Tech's New Rich Are Suffering From 'Sudden Wealth Syndrome'

By Tiffany Ap, Bloomberg

A growing post-exit ecosystem is helping founders deal with the unexpected difficulties of becoming extremely wealthy.

It was the kind of exit every entrepreneur dreams about. After bootstrapping a software startup together, Anastasia Koroleva and her husband sold for nine figures: 100% cash on Day 1, zero earnouts, no strings attached. But what followed blindsided the founder and former Skadden Arps M&A lawyer. Instead of the soft life she'd expected, Koroleva found herself dealing with years of unease and a painful divorce. Read the full story [here](#).

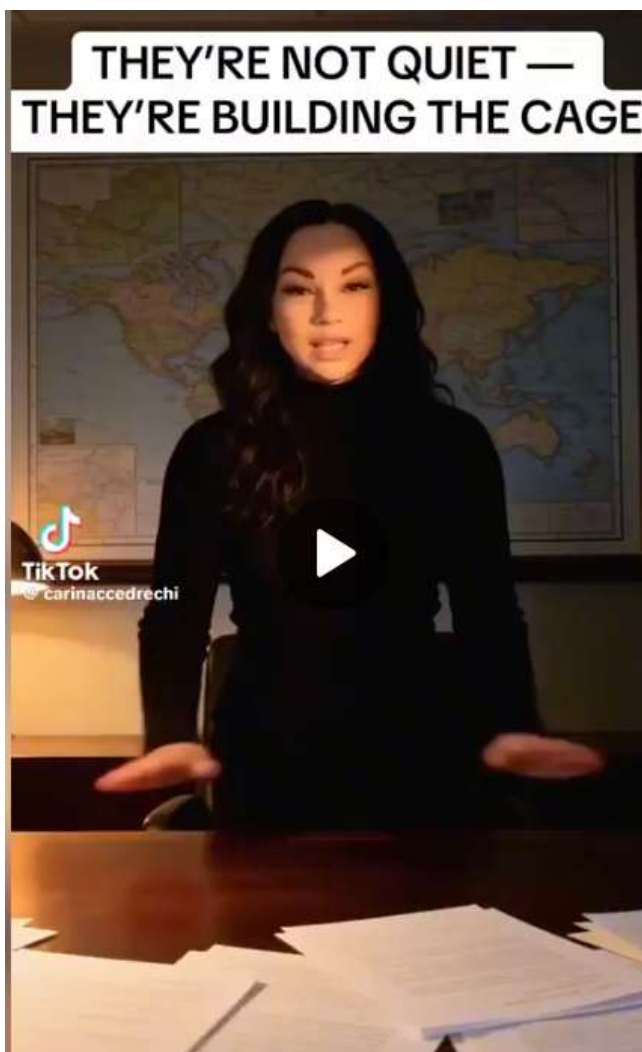

From: RIP News Worldwide

Nurse Michelle Spencer at Community Regional Medical Center in Fresno, CA described a surge in stillbirths from roughly 4 per year pre-2021 to about 20 per month after COVID vaccines were offered to pregnant patients.

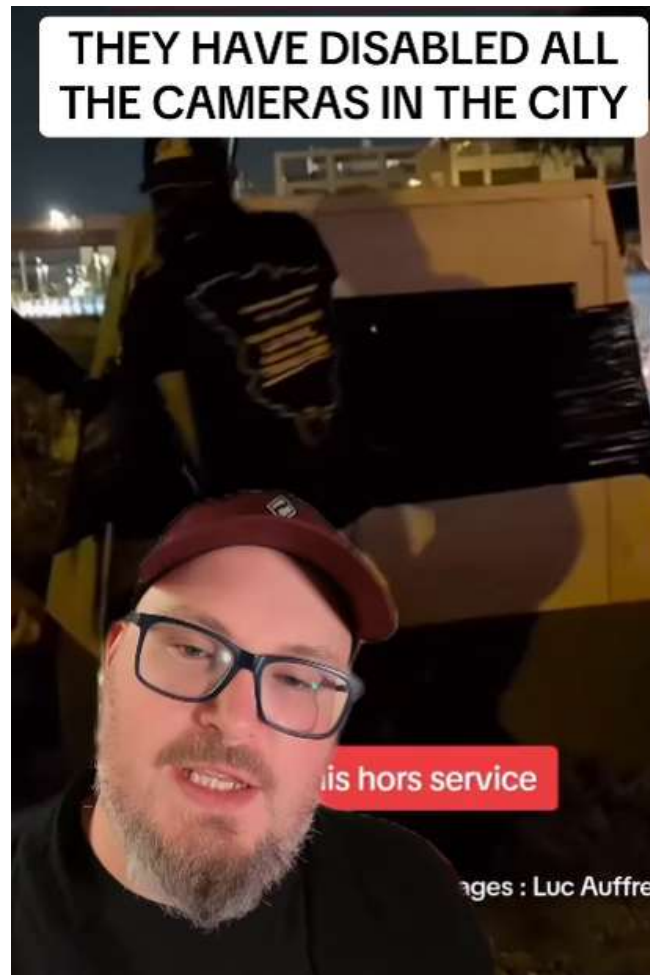

She cited an internal September 2022 email noting 22 fetal demises in August that tied a hospital record and directed nurses on handling remains rather than investigating causes.

Freely Organise and Communicate While We Still Can

France Shrink-wraps Surveillance Cameras

From JakeVSTheState, Instagram

Comments from the post:

- Perhaps a good thing to do here in NZ as the cameras increase. They're not defacing or breaking them, they're covering them up and keeping authorities guessing.
- Zero criminal damage and no vandalism means no criminal investigations and no arrests
- The revolution will be televised and blacked out at the same time!
- Beautiful organization! Look at people coming together

See the collaborative action [here](#).

Teens Who Can't Put Down TikTok and Instagram, Losing Their Sense of Time

By: Julie Jargon Wall Street Journal

Instant gratification from short video clips makes it hard for people—particularly kids—to understand how the present affects the future, says study.

The constant flux of TikTok clips, Instagram reels and YouTube shorts running through our social-media feeds isn't only zapping our attention spans, it's altering how we perceive time. Read more [here](#).

Left and Right Are Not Extreme Opposites

Do you still believe in politics? Or has it lost your vote? I often get called extreme left and extreme right in the same comments section.

Conspiracy Theory No More - Edison Research Confirms:

Dominion helped overthrow the U.S. Election in 2020.

States using Dominion Voting Systems switched 435,000 votes from Trump to Biden.

Dominion deleted 2.7 million Trump votes nationwide.

Including over 1 million votes switched from President Trump to Biden in Pennsylvania alone.

There was anticipation to see what Julian Assange was going to declassify upon his return to WikiLeaks. And he hasn't disappointed. WikiLeaks shows 17 minutes that demonstrate that the 1969 moon landing was filmed in the Nevada desert. Watch this fascinating footage [here](#).

Essential Reading & New Releases

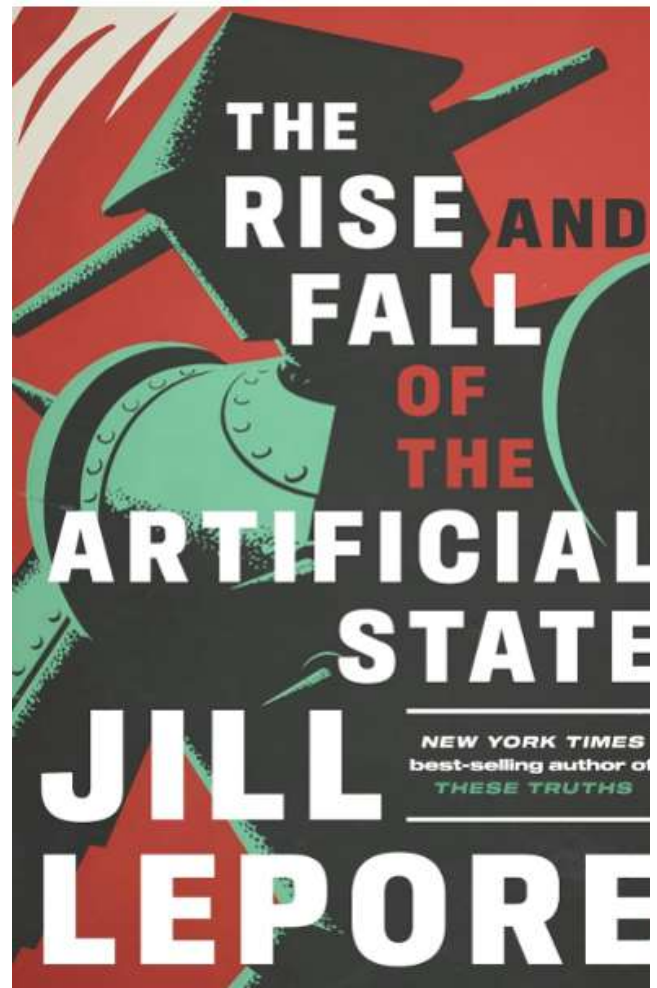

Essential Reading

An unofficial history of the roll-out of the "New Normal" during the 2020-2021 Covid-19 pandemic, and an analysis of this new, pathologized-totalitarian ideology that has radically transformed societies around the world.

From the proclamation of the "New Normal" and the initial propaganda blitzkrieg in March of 2020, and on through the global lockdowns, the suspension of constitutional rights, the mask mandates, the social distancing, the censorship, the segregation and persecution of "the Unvaccinated," and,

New Release

The Rise and Fall of the Artificial State demonstrates how technology has corroded global democracy, leading to the destruction of both human community and capacity for self-government, creating a new form of AI government, a digital citizen's assembly, where AI will recommend the course of action to humans in place of human-run legislatures.

finally, the collapse of the official Covid narrative at the end of 2021, the essays in this volume comprise an "as-it-happened" record of how insane and totalitarian things got, and puts the madness into context.
